VHF rdo rng stn via the Thurman, Colo. omnirng stn; Goodland, Kans. omnirng stn; Hill City, Kans. omnirng stn; Salina, Kans. omnirng stn; Topeka, Kans. VHF rdo rng stn to the Kansas City, Mo. omnirng stn. From the intsxn of the NW crs of the Kansas City, Mo. rdo rng and the W crs of the Columbia, Mo. rdo rng to the intsxn of the NE crs of the Kansas City, Mo. rdo rng and the W crs of the Columbia, Mo. rdo rng.

(3) Red civil airway No. 15 is amended to read: (Reno, Nev. to Phoenix, Ariz.) From the intsxn of the NE crs of the Reno, Nev. rdo rng and the NW crs of the Fallon, Nev. rdo rng via the Fallon, Nev. rdo rng stn; the intsxn of the SE crs of the Fallon, Nev. rdo rng with a point at lat. 38°39'50", long. 117°51'00"; the Tonopah, Nev. rdo rng stn; the intsxn of the S crs of the Tonopah, Nev. rdo rng with a point at lat. 37°25'30", long. 117°09'30"; thence via lat 36°17'45", long. 116°25'30" to the Goodspring, Nev. non-directional rdo bcn. From the Las Vegas, Nev. rdo rng stn.....

(4) Red civil airway No. 27 is amended to read: (Atlanta, Ga. to Detroit, Mich.) From the Atlanta, Ga. NAS rdo rng stn via the intsxn of the N crs of the Atlanta, Ga. NAS rdo rng and the S crs of the Knoxville, Tenn. rdo rng; Knoxville, Tenn. rdo rng stn; Corbin, Ky.....

(5) Blue civil airway No. 5 is amended to read: (Galveston, Tex. to Salina, Kans.) ... From the Hutchinson, Kans. omnirng stn via the intsxn of the Hutchinson, Kans. omnirng 15° mag enroute radial and the Salina, Kans. omnirng 174° mag enroute radial to the Salina, Kans. omnirng stn.

(6) Blue civil airway No. 25 (Cordova, Alaska to Big Delta, Alaska) is amended by changing the name "Cordova (Hinchinbrook Island, Alaska) to "Hinchinbrook, Alaska."

(7) Blue civil airway No. 36 is amended to read: (Thurman, Colo. to North Platte, Nebr.) From the intsxn of the Thurman, Colo. omnirng 87° mag enroute radial and the S crs of the Akron, Colo. rdo rng via the Akron, Colo. rdo rng stn to the North Platte, Nebr. rdo rng stn.

(8) Blue civil airway No. 65 is amended to read: (Garden City, Kans. to Hill City, Kans.) From the Garden City, Kans. rdo rng stn to the intsxn of the N crs of the Garden City, Kans. rdo rng and the Hill City, Kans. omnirng 265° mag enroute radial.

(9) Blue civil airway No. 78 is amended by changing caption to read: (Spring Bay, Utah to Malad City, Idaho).

(10) Blue civil airway No. 79 is added to read: (Burlington, Iowa to Iowa City, Iowa). From the Burlington, Iowa rdo rng stn to the intsxn of the N crs of the Burlington, Iowa rdo rng and the W crs of the Moline, Ill. rdo rng.

(11) Blue civil airway No. 80 is added to read: (Garden City, Kans. to Goodland, Kans). From the Garden City, Kans. omnirng stn to the Goodland, Kans. omnirng stn.

CONTROL AREAS: (1) Amber civil airway No. 5 is amended to read: (Grand Isle, La. to Milwaukee, Wis.) All of Amber civil airway No. 5 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the altitude change radials and enroute radials from the New Orleans, La. omnirng stn to the McComb, Miss. omnirng stn via the direct enroute and 15° west altitude change radials; from the McComb, Miss. omnirng stn to the Jackson, Miss. omnirng stn via the direct enroute and 15° west altitude change radials; from the Jackson, Miss. omnirng stn to the Greenwood, Miss omnirng stn via the direct and 15° west altitude change radials; from the Greenwood, Miss. omnirng stn to the Memphis, Tenn. omnirng stn via the direct enroute and 15° east alt change radials.

(2) Red civil airway No. 1 is amended to read: (Portland, Oreg. to Kansas City, Mo.) All of Red civil airway No. 1 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Denver, Colo. VHF VAR rdo rng stn to the Thurman, Colo. omnirng stn via the Thurman, Colo. omnirng direct enroute radial; from the Thurman, Colo. omnirng stn to the Goodland, Kans. omnirng stn via the direct enroute and 15° N and S alt change radials; from the Goodland, Kans. omnirng to the S alt change radials; from the Goodland, Kans. omnirng to the Hill City, Kans. omnirng via the direct enroute and 15° N and S alt change radials; from the Hill City, Kans. omnirng to the Salina, Kans. omnirng via the direct enroute and 15° N and S alt change radials; from the Salina, Kans. omnirng stn to the Topeka, Kans. VHF VAR rdo rng stn via the Salina, Kans. omnirng direct enroute radial; from the Topeka, Kans. VHF VAR rdo rng stn to the Kansas City, Mo. omnirng stn via the Kansas City, Mo. omnirng direct enroute radial.

(3) Red civil airway No. 15 is amended to read: (Reno, Nev. to Phoenix, Ariz.) From the Las Vegas, Nev. rdo rng stn to the Phoenix, Ariz. rdo rng stn.

(4) Red civil airway No. 27 is amended by changing caption to read: (Atlanta, Ga. to Detroit, Mich.)

(5) Red civil airway No. 35 is amended to read: (Pueblo, Colo. to Wichita, Kans.) .... Hutchinson, Kans. omnirng stn to Wichita, Kans. omnirng stn via the direct enroute radials.

(6) Blue civil airway No. 79 is added to read: (Burlington, Iowa to Iowa City, Iowa). All of Blue civil airway No. 79.

(7) Blue civil airway No. 80 is added to read: (Garden City, Kans. to Goodland, Kans.) All of Blue civil airway No. 80 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Garden City, Kans. omnirng stn to the Goodland, Kans. omnirng stn via the direct and 15° W alt change radials.

(8) Blue civil airway No. 65 is amended by changing caption to read: (Garden City, Kans. to Hill City, Kans.)

(9) Blue civil airway No. 78 is amended by changing caption to read: (Spring Bay, Utah to Malad City, Idaho).

CONTROL AREA EXTENSIONS: (1) Control area extension (Florence, S. C.) is amended to read: From the Florence, S. C. rdo rng stn extending 5 mi. either side of the SE crs of the rdo rng to a point 20 mi. SE of the rdo rng stn, and extending 5 mi. either side of the NW crs of the rdo rng to a point 25 mi. NW of the rdo rng stn.

(2) Control area extension (Ft. Myers, Fla.) is amended to read: From the Ft. Myers, Fla. rdo rng stn extending 5 mi. either side of the SW crs of the rdo rng to a point 20 mi. SW of the rdo rng stn, and extending 5 mi. either side of the NE crs of the rdo rng to Blue civil airway No. 75.

(3) Control area extension (Greenwood, Miss.) is amended to read: From the Greenwood, Miss. rdo rng stn extending 5 mi. either side of the E crs of the rdo rng to a point 20 mi. E of the rdo rng stn and extending 5 mi. either side of the W crs of the rdo rng to a point 25 mi W of the rdo rng stn.

(4) Control area extension (Monroe, La.) is amended to read: From the Monroe, La. rdo rng stn extending 5 mi. either side of the SW crs of the rdo rng to a point 20 mi. SW of the rdo rng stn and extending 5 mi. either side of the NE crs of the rdo rng to a point 25 mi. NE of the rdo rng stn.

(5) Control area extension (Lynchburg, Va.) is amended to read: From the Lynchburg, Va. rdo rng stn extending 5 mi. either side of the N crs of the rdo rng to a point 20 mi N of the rdo rng stn.

(6) Control area extension (Iowa City, Iowa) is amended to read: Within a 5 mi. radius of the Iowa City Arpt extending 5 mi. either side of a bearing 85° mag from the arpt to its intsxn with the N crs of the Burlington, Iowa, rdo rng, and from the Iowa City non-directional rdo bcn extending 5 miles either side of a bearing 265° mag from the non-directional rdo bcn to a point 25 miles W of the non-directional rdo bcn.

(7) Control area extension (Tallahassee, Fla.) is amended to read: From the Tallahassee, Fla. (Dale Mabry Fld) ILS lclzr extending 5 miles either side of the ILS lclzr crs to a point 30 miles SE of the ILS lclzr, and from the Tallahassee rdo rng stn extending 5 miles either side of the S crs of the rdo rng to a point 25 miles S of the rdo rng stn.

(8) Control area extension (Orlando, Fla.) is amended by adding to present control area extension: "and from the Orlando, Fla. rdo rng stn extending 5 miles either side of the NW crs of the rdo rng to a point 25 miles NW of the rdo rng stn.

(9) Control area extension (Albany, Ga.) is amended to read: From the Albany, Ga. rdo rng stn extending 5 miles either side of the E crs of the rdo rng to a point 20 miles E of the rdo rng stn and extending 5 miles either side of the W crs of the rdo rng to a point 25 miles W of the rdo rng stn.

(10) Control area extension (Winston Salem, N. C.) is amended to read: From the Smith-Reynolds Arpt, Winston Salem, N. C. ILS lclzr extending 5 mi either side of the lclzr crs to a point 30 miles SE of the ILS lclzr, and from the Winston Salem, N. C. rdo rng stn extending 5 miles on the SW side of the NW crs of the rdo rng and to the southern boundary of Red civil airway No. 34 on the NE side of the NW crs of the rdo rng to a point 25 miles NW of the Winston Salem rdo rng stn.

(11) Control area extension (Fairfield, Calif.) is amended to read: All that area NE of the Fairfield, Calif., Travis AFB rdo rng stn bounded on the W by Blue civil airway No. 7, on the NE by Amber civil airway No. 1 and on the SE by Amber civil airway No. 8, and all that area W of the Travis AFB rdo rng stn bounded on the SW by Blue civil airway No. 54, on the S by Amber civil arwy No. 8, on the E by Blue civil airway No. 7, on the N by a line between points at lat 38°21'30", long. 121°57'00", and lat 38°08'30", long. 122°33'10" and on

(12-5-50)

the W by long. 122°33'10".

(12) Control area extension (Greensboro, N. C.) is amended to read: From the Greensboro, N. C. rdo rng stn extending 5 miles either side of the SE crs of the rdo rng to a point 25 miles SE of the rdo rng stn including the area between the Greensboro control area extension and the Winston Salem, N. C. control area extension.

(13) Control area extension (Columbia, S. C.) is amended to read: From the Columbia Arpt extending 5 miles either side of the centerline of the NE-SW rnwy of the arpt to a point 30 miles SW of the arpt, and all that area W of the Columbia, S. C. rdo rng stn bounded on the NE by Blue civil airway No. 28, on the SE by Red civil arwy No. 16 and on the W by a N-S line 25 miles W of the Columbia rdo rng stn.

(14) Control area extension (Pensacola, Fla.) is added to read: Within 5 miles either side of the NE and SW courses of the Saufley Fld, NAAS rdo rng, extending from Blue civil arwy No. 59 to a point 10 miles SW of the Saufley Fld NAAS rdo rng stn, excluding the portion overlapping the danger areas.

(15) Control area extension (Johnstown, Pa.) is added to read: From the Johnstown, Pa. non-directional rdo bcn extending 5 mi. either side of a bearing 225° mag from the non-directional rdo bcn to Red civil arwy No. 20.

(16) Control area extension (Dothan, Ala.) is added to read: From the Dothan, Ala. rdo rng stn extending 5 miles either side of the NE crs of the rdo rng to a point 25 miles NE of the rdo rng stn.

(17) Control area extension (Pine Bluff, Ark.) is added to read: From the Pine Bluff, Ark VHF rdo rng stn extending 5 miles either side of the SW crs of the rdo rng to a point 25 mi. SW of the VHF rdo rng stn.

CONTROL ZONES: (1) Change name of arpt at Nome, Alaska to read "Nome Field" instead of "Marks AFB".

(2) Rapid City, S. Dak. control zone is amended to read: Within a 5 mile radius of the Rapid City AFB and within a 5 mile radius of the Rapid City Mun Arpt extending 2 miles either side of the S crs of the Rapid City rdo rng to a point 10 miles S of the rdo rng stn, and extending 2 miles either side of the E crs of the rdo rng to a point 10 miles E of the rdo rng stn, excluding that portion which overlaps the Rapid City AFB control zone.

(3) Pensacola, Fla. control zone is added to read: Within a 5 mile radius of the NAAS Saufley Fld, Pensacola, Fla. excluding that portion which overlaps Blue civil arway No. 59.

(4) Westover, Mass. control zone is added to read: Within a 5 mile radius of Westover AFB extending 2 miles either side of the NE crs of the Westover AFB rdo rng to a point 10 miles NE of the Quabbin FM, excluding that portion which overlaps the Barnes Arpt, Westfield, Mass. and excluding the airspace within 1/2 mile radius of the Springfield, Mass. Mun Arpt.

(5) Carlsbad, N. Mex. control zone is added to read: Within a 5 mile radius of the Carlsbad, N. Mex. Mun Arpt extending 2 miles either side of the SE crs of the Carlsbad rdo rng to a point 5 miles SE of the Carlsbad rdo rng stn.

REPORTING POINTS: (1) Green civil arway No. 5 is amended to read: (Los Angeles, Calif. to Boston, Mass.) ...Phoenix, Ariz. rdo rng stn; the intsxn of the S crs of the Phoenix, Ariz. rdo rng and the NW crs of the Tucson, Ariz. rdo rng.....

(2) Amber civil arwy No. 1 (U. S. - Mexican Border to Nome, Alaska), is amended by changing the name of "Cordova (Hinchinbrook Island), Alaska, to "Hinchinbrook, Alaska and by changing the name "Cordova (Mile 13), Alaska to "Cordova, Alaska."

(3) Amber civil arwy No. 9 (Charleston, S. C. to New York, N. Y.) is amended by adding the following reporting point: "Salisbury, Md. VHF rdo rng stn."

(4) Red civil arwy No. 15 is amended by changing the caption to read: (Reno, Nev. to Phoenix, Ariz.).

(5) Red civil airway No. 27 is amended by changing caption to read: (Atlanta, Ga. to Detroit, Mich.)

(6) Red civil airway No. 33 is amended to read: (Richmond, Va. to Boston, Mass.) Arcola, Va. rdo rng stn; the intsxn of the NE crs of the Arcola, Va. rdo rng and the S crs of the Harrisburg, Pa. rdo rng.

(7) Red civil airway No. 45 is amended to read: (Blackstone, Va. to Allentown, Pa.) Manakin, Va. non-directional rdo bcn.

(8) Red civil airway No. 83 is amended to read: (Gila Bend, Ariz. to Rodeo, N. Mex.) Douglas, Ariz. rdo rng stn.

(9) Red civil airway No. 88 is amended to read: (Albuquerque, N. Mex. to Hobbs, N. Mex.) Hobbs, N. Mex. rdo rng stn.

(10) Red civil airway No. 91 is amended to read: (Salt Flat, Texas to Hobbs, N. Mex.) Carlsbad, N. Mex. rdo rng stn.

(11) Blue civil airway No. 29 is amended to read: (Raleigh, N. C. to Lynchburg, Va.) The intsxn of the NE crs of the Greensboro, N. C. rdo rng and the SE crs of the Lynchburg, Va. rdo rng.

(12) Blue civil airway No. 56 is amended to read: (Elizabeth City, N. C. to Washington, D. C.) Langley, Va. AFB rdo rng stn.

(13) Blue civil airway No. 65 is amended by changing the caption to read: (Garden City, Kans. to Hill City, Kans.)

(14) Blue civil airway No. 78 is amended to changing the caption to read: (Spring Bay, Utah to Malad City, Idaho.

(15) Blue civil airway no. 79 (Burlington, Iowa to Iowa City, Iowa). No reporting point designation.

(16) Blue civil airway No. 80 (Garden City, Kans. to Goodland, Kans.) No reporting point designation.

AIRMAN'S GUIDE

SPECIAL NOTICE

Effective January 1, 1951, all CAA AIRWAY COMMUNICATIONS STATIONS and AIRPORT TRAFFIC CONTROL TOWERS in the continental United States will discontinue receiving watches on 3117.5 kc.

DIRECTORY OF AIRPORTS — Pages 21 through 76

RADIO FACILITY DATA — Pages 7 through 20

NOTICES TO AIRMEN — Pages 77 through 96

VOL. 5, NO. 20 . . DECEMBER 19, 1950

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult teletype NOTAMS.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO PILOTS AT CIVIL AND MILITARY AIRPORTS IN ACCORDANCE WITH THE FOLLOWING:

CAA GCA UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest GCA.

AIR FORCE GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective AFB.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call nearest air traffic control facility requesting GCA and further instructions.

Contact under VFR: VFR check-out training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, Air Force towers may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at pilot's discretion. No AF unit can transmit directly on tower low frequency. In addition to frequencies listed below, Air Force GCA emergency VHF transmissions are made on 121.5 mc. Simplex service on 3117.5 kc is available at all installations as an alternate emergency frequency to work scheduled air carrier aircraft.

NAVY GCA UNITS- Available to civil pilots in emergency or by prior arrangement with C.O. of respective NAS or MCAS.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility or associated station control tower.

Contact under VFR: VFR check-out training flights by prior arrangement with the C.O. of respective station.

Most Navy GCA units can transmit instructions on tower low frequency. In addition to frequencies listed below, Navy GCA emergency transmissions are made on 121.5 mc. Simplex service on 3117.5 kc is available at all installations as an alternate emergency frequency to work scheduled air carrier aircraft.

NOTE: Air Force and Navy GCA units require twenty (20) to thirty (30) minutes for warming up outside of scheduled hours of operation. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

LEGEND

G/T = Guards all frequencies on which station transmits. "G/T except 3295" indicates transmitting frequency 3295 kc not guarded.
HF = 3475,4890,6640 kc.
 # = Guards all VHF frequencies station transmits.
(E) = Emergency use, as 121.5 (E).
**** = Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.**
*** = Air Force guard 4495,4765,3117.5 kc and 121.5 mc.**
(D) = Day. (N) = Night.
→ = New or revised data.
V = New facilities or name changes, see page 3.

INSTRUMENT LANDING SYSTEMS

GP = Glide Path
L5 = Instrument Approach (neon)
L7 = Hi-intensity Approach Lgts
(W) = Without voice

→ = New or revised data
+ = additional data will be found in Notices to Airmen section.
(BC-unusable) = Back course unusable

AIR NAVIGATION RADIO AIDS

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, *such as monitoring* or control equipment or may not have been flight-checked and are *subject to shut-down at any time* without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

NOTE: See OMNIRANGE USE, page 79.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
✓ = New facilities or name changes, see page 20
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . .Approach Control Tower, CAA
B. . . .Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . .Control Tower, CAA
CA. . .Control Tower, Air Force
CI . . .Control Tower (City, County, Private, etc.)
CN. . .Control Tower, Navy
D. . . .Distantly controlled
FM. . .VHF fan marker (100 watts)
GCA. .Ground Controlled approach system
H. . . .Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . .Non-directional radio beacon (Homing), power 2000 watts or more
ILS. . .Instrument Landing System (voice on localizer channel)
IM. . .VHF boundary marker
J. . . .L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. .VHF fan marker, low powered (5 watts)
LMM .Compass locator station when combined with middle marker of ILS
LOM: .Compass locator when installed at outer marker site or within 5.5 miles of middle marker
MH . . .Non-directional radio beacon (homing) power less than 50 watts
ML . . .Range (loop radiators), power less than 50 watts
MM. . .VHF middle marker
MOR. .Low frequency omni-directional range
MRA. .Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. .Range (loop radiators), power 50 or more, but less than 150 watts
OM. . .VHF outer marker
P. . . .Point-to-Point radio
RA. . .Range (adcock, vertical radiators), power 150 watts or more
RL. . .Range (loop radiators), power 150 watts or more
S. . . .Simultaneous (range signals and voice) type of transmitter
T. . . .Teletype
TX. . .Principal teletype
V. . . .Additional VHF voice feature on other than range frequency
VAR. .Visual-aural VHF range
VOR. .Omni VHF omni-directional range (omni-range)
W. . . .Without voice facilities
Z. . . .VHF station location marker at a range station

FREQUENCY LEGEND

V = 140.58 and 111.1 mc transmitted.
# = Guards same VHF frequencies station transmits except 111.1 mc.
(1) = 3105,4495 kc guarded
(2) = 3105,4495,3117.5 kc, 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7,140.58 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-140.58,122.1 = guards every frequency in group (3) except 140.58 and 122.1
(3),6210-140.58 = guards 6210 plus every frequency in group (3) except 140.58

NOTES

1. All CAA Control towers operating on 24 hour basis stand continuous watch on 3117.5 kc, airline frequency.
   See page 79 for list of CAA INSACs which stand watch on 3117.5 kc.
2. Range courses are magnetic in-bearings.
3. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
4. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
5. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the channel or frequency on which the station reply is expected.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U.S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitvity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-Air Force	CG	-Coast Guard	MG	-Misc. Govt
A	-Army	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
				P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

- h - runway is paved (concrete, asphalt or similar type of paving)
- aw - allway field
- (26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Strip lights or portable runway lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway
- 5 - Instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.

Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:

F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.

Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular.

FUEL OCTANE (cont)

Air Force and Navy Fuel:

A+: 115/145 oct.
A : 100/130 oct.
B : 91/98 oct.
C : 73/80 oct.
J : JP - 1
J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U.S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(c) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "+" indicates additional data in Notices to Airman Section.

(k) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(l) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U. S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", A. F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A.F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY AND COAST GUARD: Listed below are Standard VHF Channels for the Air Force, Navy and Coast Guard.

AIR FORCE*	NAVY ARC-1** receivers	NAVY ARC-3, -5 SCR-522***	COAST GUARD	SERVICE
A...140.58	1...140.58			CAA Airway (Range Station)
		A...121.5	1...121.5	Military Emergency
B...126.18	2...142.74	B...142.74	2...142.74	Control towers
C...137.88	3...132.3	C...132.3	3...132.3	Military Airways (137.88 secondary use USAF control towers)
D...121.5				Military Emergency
		D...140.58	Grd D...140.58	CAA Airways (Range Station)
E...( )	4...( )	E...( )		Tactical or as required
			4...118.1	International airdrome control towers
F...( )	5...( )	F...( )		Tactical or as required
			5...143.28	General Communications
G...133.80	6...143.64	G...142.02	6...143.64	GCA
H...134.1	7...142.02	H...134.64	7...142.02	GCA
	8...134.64		8...134.1	GCA
	9...126.18		9...126.18	Control towers
Guard.....121.5				Military emergency
U...108.3				ILS localizers and VAR Ranges
V...108.7				"
W..109.1				"
X...109.5				"
Y...109.9				"
Z...110.3				"

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**This frequency plan is effective upon completion of modification AN/ARC-1 guard channel in accordance with BuAer Technical Order to permit tuning to 121.5 mc. Prior to completion of this modification, 140.58 mc for CAA Airways will be carried in guard channel of AN/ARC-1 equipment, and 121.5 mc in Channel 1.

***In 4 channel equipment (ARC-5 and SCR-522) 126.18 mc or 142.02 mc may be substituted on Channels C and D in accordance with operational requirements.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U. S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37, AIR FORCE REGULATION 60-16, JULY 11, 1949".

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 thru 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U. S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Travis AFB, California.

BERMUDA: Mitchel AFB, N. Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Travis AFB, Calif.,; or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D. C.; Selfridge AFB, Mich.; or Westover AFB, Mass.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Texas; Brookley AFB, Ala.; Washington National Airport, D. C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Texas; MacDill AFB, Fla.; Washington National Airport, D. C.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Airport, D. C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Travis AFB, California.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D. C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide", published by MATS and now distributed to all Air Force bases should be consulted prior to departure for foreign clearing stations, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following publications are now distributed in accordance with AF Regulation 5-12, and supersede listings given in paragraph 5 of this Regulation. Base operations officers, weather and communication units, should check copies in use to insure that latest issues and all revisions are available. Mailing lists are now maintained in accordance with groupings of material as follows:

GROUP I MATERIAL: II-B. Instructions for the Operation of Communications Facilities, First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8 and II-B-11).

GROUP II MATERIAL: Location Identifiers, Fourth Edition, July 1, 1950, with two revisions.

GROUP III MATERIAL: Contractions, Fourth Edition, December 1, 1949.

GROUP IV MATERIAL: Civil Airways Mileage Chart of June 14, 1950.

GROUP V MATERIAL: Teletype Service "A" Manual, September 19, 1950; Teletype Service "C" Manual, August 8, 1950; Teletype Maps: M-11, December 1, 1949, and M-14 April 15, 1950 (Service "A"); M-10, October 1, 1949, and M-13, November 1, 1950 (Service "C"); M-58, August 15, 1950 (Service "A", "C" and "O"); M-59, November 5, 1949 (Service "B").

GROUP VI MATERIAL: Teletype Service "O" Manual, May 1, 1950, with 6 revisions; Teletype Maps M-89, February 1, 1950 (Service "O") and M-58 (Service "A", "C" and "O").

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Headquarters, USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT-NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders

---

PROVISION OF PLAIN LANGUAGE TERMINAL FORECASTS: All CAA communications facilities now provide Air Force pilots with terminal forecasts in plain language upon request. Terminal forecast information for all Air Force bases and for Patuxent River Naval Air Station, Maryland, will be available. Pilots should make full use of this service in requesting weather information.

IMPLEMENTATION OF 136.80 MC IN CHANNEL "G": Use of 136.80 mc to replace 137.70 mc as GCA Search Control Frequency in "G" Channel was implemented December 1, 1950. Frequency 137.70 mc was retained in GCA units for a period of 30 days after implementation of 136.80 mc. Frequency 136.80 mc was implemented at VHF/DF stations within the continental U. S., replacing 137.70 mc on December 1, 1950, and will be used on a secondary basis as a common VHF/DF training frequency. (Where VHF/DF and GCA facilities are within interference rng of each other, routine navigational VHF/DF aid will be furnished on Channel G on a secondary basis, emergency VHF/DF aid will be on 121.5 mc, and tactical or training frequencies avail. will be used whenever possible. Pilots and operators engaging in VHF/DF training will monitor G channel before transmitting so as not to interfere with GCA transmission.) Secondary uses of 137.70 mc by tactical organizations will be conducted on 136.80 mc after implementation.

✓ SPECIAL CHARTS OF ATOMIC ENERGY AIRSPACE RESERVATIONS: The Atomic Energy Commission has issued a special chart depicting airspace reservations in the United States. Copies of this chart are being supplied each Air Force Base, AF Reserve Unit, National Guard Unit and other activities on the same mailing list basis as used for Airman's Guide. Operations officers should prominently display this chart and assure that pilots contemplating flight adjacent to these areas are briefed upon their existence, location and restricted status.

✓ CHANGES FOR PILOT'S HANDBOOK (EAST) U. S.: (1) AL-342 dtd December 29, 1949. Chanute AFB, Rantoul, Ill. Initial apch alt - NE crs 1900' from int NW crs LAF rng - SE crs 1900' from int SW crs LAF rng - SW crs 2000' from int NW crs EFF rng - NW crs 1900' from int SW crs JOT rng.

(2) AL-290 dtd January 30, 1950. Norfolk, Va. NAS (East Fld). Initial apch: E - MEA - 1500' after int NE Limb Norfolk rng; S - 1500' int NW crs Weeksville; W - 1500' Eclipse FM.

✓ CHANGES FOR PILOT'S HANDBOOK (WEST) U. S.: (1) AL-374 dtd April 7, 1950. San Diego NAS, Calif. Initial apch: E - 8000' int W crs ELC, 6000' Barrett Lake FM, 3600' after Jamul "H", 1500' after Lemon Grove FM.

(2) AL-197 dtd January 6, 1950. Houston, Texas, Ellington AFB. Instrument landing rnwy: 04R. Power lines 35' approximately 1400' from apch end of rnwy. 50' building 500' from apch end of rnwy 04R extends into clear zone.

(3) AL-293 dtd 28 Nov. 49. Alameda NAS, Alameda, Calif. Distance Oakland rng to Alameda NAS 5.5 mi.

(4) Larson AFB, Wash. The following procedure is authorized, utilizing the Ephrata rdo rng, freq. 269 kc, ident: EPH. Field elev: 1190', ceiling: 700'; min alt over fld: 1890'. Initial approach altitudes: North - Minimum enroute altitude; East - 5000' from Spokane rng; 3500' from Harrington Fan Marker; South - Minimum enroute altitude; West - 7000' from Ellensburg Range. Final Approach Course: West. Procedure turn: South side W crs, 2500' within 10 miles; 3000' within 25 miles. Altitude over rng on final approach: 2200'. Bearing and distance, stn to fld: 88°, 8.7 miles. If visual ctc not established at authorized landing minimums within 0 miles after passing Ephrata rdo rng, or if landing not accomplished, climb to 3500' on E crs.

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing a[illegible]s,

however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible, the items should be reported directly to the Office of Aviation Development, Attention: W-155, C.A.A., Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Notices to Airmen Section.

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in or over Canadian territory.

INSTRUCTIONS FOR MONITORING ILS: Communications should be established with the appropriate control tower or with the communications stations where there is no control tower prior to starting an ILS approach. This is in order to receive advisory information as to the operation of the facility. It is also recommended that the aural signal of the ILS be monitored during an approach to assure continued reception and receipt of advisory information.

OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereat.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitation, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions carried) in the Notices to Airmen section are facility coordinates, post-deadline data, airports closed because of construction, abandoned or reported abandoned, or data impossible to incorporate in the two above tabulations.

DIRECT COMMUNICATIONS WITH AIR ROUTE TRAFFIC CONTROL CENTERS:

The CAA has inaugurated a procedure whereby pilots operating on IFR flight plans may have direct communication with air route traffic controllers at certain control centers. VHF on a simplex basis (call-up and reply on the same frequency) is used. This enables the controller to issue traffic clearances and receive indications of compliance therewith in such a manner that all air traffic is expedited. The center will guard the assigned frequency. However, each specific aircraft, with which the center desires to establish direct communication for control purposes, will receive a clearance through the appropriate CAA, AACS or Air Carrier Communications Station, indicating the time or place the controller desires to communicate directly with the pilot.

The following locations at which this direct communications procedure is available are also listed in the Air Navigation Radio Aids section of the Airman's Guide. Each one is listed alphabetically following the tower listing. When additional locations establish this procedure they will be similarly listed.

Radio Call	Frequency	Commissioned
Oakland Center	120.3 mc	October 30, 1950
Chicago Center	119.5 mc	May 10, 1949
Washington Center	120.3 mc	September 1, 1949
New York Center	120.7 mc	January 25, 1950
	120.3 mc	October 11, 1950
Atlanta Center	120.7 mc	July 1, 1950
Pittsburgh Center	118.7 mc	November 2, 1950

CAA AIRWAY COMMUNICATIONS STATIONS GUARDING 3117.5 KC: All CAA communications stations other than those listed below discontinued receiving watch on 3117.5 kc, July 1, 1950.

Acomita, N. M.	Hutchinson, Kans.	Rock Springs, Wyo.
Akron, Colo.	Joliet, Ill. (Naperville)	Salina, Kans.
Battle Mtn, Nev.	Kirksville, Mo.	Santa Fe, N. M.
Butler, Mo.	Lafayette, Ind.	Sidney, Neb.
Columbia, Mo.	Lafayette, La.	Springfield, Ill.
Dalhart, Texas	Laramie, Wyo. (Rock River)	Springfield, Mo.
Dodge City, Kans.	Las Vegas, N. M.	Sinclair, Wyo. (Cherokee)
Dyersburg, Tenn.	Louisville, Ky.	Terre Haute, Ind.
Eagle, Colo.	Lovelock, Nev.	Texarkana, Ark.
Effingham, Ill.	Malden, Mo.	Tucumcari, N. M.
El Dorado, Ark.	Mansfield, Ohio	Vichy, Mo.
Elko, Nev.	Moline, Ill.	Russell, Kans. (Waldo)
Emporia, Kans. (Lebo)	Monroe, La.	Walnut Ridge, Ark.
Farmington, Mo.	Needles, Calif.	Wendover, Utah
Ft. Bridger, Wyo. (Kemmerer)	North Platte, Neb.	Wilkes-Barre, Pa.
Gage, Okla.	Otto, N. M.	Williamsport, Pa.
Garden City, Kans.	Paducah, Ky.	Winslow, Ariz.
Galveston, Texas	Parkersburg, W. Va.	Worcester, Mass. (Gardner)
Grand Island, Neb.	Prescott, Ariz.	Zanesville, Ohio
Grand Junction, Colo.	Presque Isle, Me.	Suni, N. M.
Greenwood, Miss.	(Sprague ville)	

Locations in parenthesis are controlled from listed stations.

NEW TRIAL LORAN RATE 1H-O: A temporary Loran Chart has been prepared for use with the supplemental Loran Rate 1H-O. Temporary charts have been mailed to airlines in order that this trial rate 1H-O may be evaluated. Airlines operating between Cape Hatteras and Cape Cod which have not received a copy of this chart, may obtain one free upon request to Commandant (OAN) U. S. Coast Guard, Washington 25, D. C.

CONTROL AREA EXTENSION AND REPORTING POINT AMENDMENTS: Effective 0001 EST January 1, 1951, unless otherwise advised, control area extensions and reporting points are amended in whole or in part as follows:

CONTROL AREAS: (1) Control area extension Baltimore, Md. is revoked.

(2) Control area extension (Washington, D. C.) is amended to read: All that area within a 40 mile radius of the Washington National Airport, excluding that portion northeast of the airport bounded on the west by the eastern boundary of Red civil airways No. 29 and 45 and on the S by the northern boundary of Green civil airway No. 5 and excluding the Washington Airspace Reservation and all danger areas.

REPORTING POINTS: (1) Green civil airway No. 3 (San Francisco, Calif. to New York, N. Y.) is amended by ADDING the following compulsory reporting point AFTER Allentown, Pa. rdo rng stn: The intsxn of the E crs of the Allentown, Pa. rdo rng and the SW crs of the Newark, N. J. rdo rng.

(2) Red civil airway No. 23 (U. S.-Canadian Border to New York, N. Y.) is amended by deleting the following compulsory reporting point: The intsxn of the SW crs of the Poughkeepsie, N. Y. rdo rng and the NW crs of the New York (La Guardia), N. Y. rdo rng and adding in lieu thereof: the Paterson, N. J., non-directional rdo bcn.

AIR ROUTE TRAFFIC CONTROL AREA BOUNDARY REVISIONS: Effective January 1, 1951, the CLEVELAND-CINCINNATI air route traffic control area boundary on Red 85 will be relocated to the northern boundary of Red 55.

Effective immediately, the NEW YORK-PITTSBURGH air route traffic control area boundary on Green 4 is revoked to 10 miles E of the Mt. Vernon intsxn.

ON-REQUEST REPORTING POINTS: Effective January 15, 1951, the BLOOMERY on-request reporting point is established at the intsxn of the W crs of Martinsburg, W. Va. and the N crs of Front Royal, Va.

NON-STANDARD HOLDING PATTERNS: Effective immediately the following non-standard holding patterns are established:

(1) Holding point - Mt. Vernon intsxn; direction from holding point - W; direction of turn-RIGHT on N side of the E crs of Altoona, Pa.

(2) Holding point - Willow Run ILS outer marker; direction from holding point - SW; direction of turn - LEFT on W side of SW crs lclzr; time - one minute.

DANGER AREA DESIGNATIONS: The following Danger Area Amendment will be effective on January 5, 1951, unless otherwise advised:

AMENDMENT NO. 59

(1) The Barstow, California, area, published on August 17, 1949, in 14 F. R. 5122, is amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at lat. 35°37'45"N, long. 116°29'40"W; due S to lat. 35°34'30"N; due E to long. 116°23'30"W; SE to lat. 35°27'55"N, long. 116°18'45"W; due S to lat. 35°18'45"N; SW along Amber Airway No. 2 to lat. 35°07'00"N, long. 116°34'00"W; W to lat. 35°07'20"N, long. 116°43'00"W; due N to lat. 35°08'00"N; due W to long. 116°45'00"W; due N to lat. 35°09'00" N; due W to long. 116°47'00"W; due S to lat. 35°08'00"N; due W to long. 116°48'00"W; due N to lat. 35°10'00"N; due W to long. 116°49'00"W; due N to lat. 35°19'00"N; due W to long. 116°55'20"W; due N to lat. 35°37'45"N; due E to lat. 35°37'45"N, long. 116°29'40"W, point ob beginning."

(2) The Fallon, Nevada, area, published on April 21, 1949, in 14 F. R. 1913, and revised on May 12, 1950, in 15 F. R. 2839, is further revised by adding the following: Location: Fallon (Reno Chart); Description: (4) Eastgate Target: A circular area having a radius of 5 miles centered at lat. 39°15'00"N, long. 118°15'00"W, excluding that portion lying within Red Airway No. 15; Altitudes: Surface to 15,000 ft.; Time: Continuous (Firing will be conducted only when ceiling and visibility in vicinity of danger area are at least 1500 ft. and 3 miles); Using Agency: 12th Naval District, San Diego, California.

CORRECTIONS AND AMENDMENTS TO FLIGHT INFORMATION MANUAL: Correct Vol 5, No. 1, dated August 1, 1950, as follows:

(1) Page 14. Change number of Dallas, Texas INSAC from Dixon 4-1919 to Dixon 1919.

(2) Page 126. Change call letters of Augusta, Maine from KFAU to WFAU.

(3) Page 120. San Diego, California, stn KFSD. Change lctn to 4.5 miles EAST.

(4) Page 130. ADD: Belen, New Mexico. Stn KENE; Freq. 1230 kcs; Lctn: 1 S; 34-38-48, 106-46-34; Twr Hgt: 184'; Type: A.

CORRECTIONS TO AERONAUTICAL CHARTS: (1) Correct RF Chart 33, dated Sept. 13. 1950, to depict the Upton intsxn as the intsxn of the S crs of Godman AFB, Ky. and the NE crs of Bowling Green, Ky.

(2) Correct Grand Junction Sectional Chart dated Sept. 12, 1950 to show Delta, Utah VOR as Delta Rng.

CORRECTIONS TO AIRMAN'S GUIDE: Correct Airman's Guide, Vol. 5, No. 19, dated Dec. 5, 1950, as follows:

(1) Page 71. Control area extensions, paragraph (17). Correct to read: Control Area extension (Pine Bluff, Ark). From the Pine Bluff, Ark., VHF rdo rng stn extending 5 miles either side of the NE and SW courses of the rdo rng to a point 25 miles SW of the VHF rdo rng stn on the SW crs and to Green civil airway No. 5 on the NE crs.

(2) Page 71. Control zones, paragraph (2). Correct to read: Rapid City, S. Dak. control zone. Within a 5 mile radius of the Rapid City AFB and within a 5 mile radius of the Rapid City Mun Arpt extending 2 miles either side of the S crs of the Rapid City rdo rng to a point 10 miles S of the rdo rng stn and extending 2 miles either side of the E crs of the rdo rng to a point 10 miles E of the rdo rng stn.

(3) Add to control area extensions, effective Dec. 26, 1950: Control area extension (Atlanta, Ga) is amended to read: All that area 5 miles N of and parallel to the E and W courses of the Atlanta, Ga. NAS rdo rng extending from Amber civil airway No. 6 to Green civil airway No. 6 including the area S of the E and W courses of the Atlanta NAS rdo rng between Amber civil airway No. 6 and Green civil airway No. 8.

WEATHER REPORTING SERVICE

These notices are being discontinued on a trial basis since it is believed a requirement no longer exists for publication of this information in "Airman's Guide". Subscribers wishing the notices resumed should write to the Chief, U. S. Weather Bureau, Washington 25, D. C., Attn: Synoptic Section. If the demand and justification for reinstatement of the notices are sufficient, appropriate action will be taken.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

NOTE: Because of space limitations such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

[redacted]: ALBERTVILLE ARPT: 200' NW end NW/SE Strip ruf. (11-15)

ANNISTON ARPT: Ctn - strips being extended. (9-26)

BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. Taxi with ctn thru intsxn Rnwy 6-24 and black top rnwy, two high intensity rnwy lgts are lctd in center of black top rnwy. E/W and NE/SW Sod Strips clsd (const). (12-5) No Navy acft svcg avail from lcl sunset to 0800 CST. Crash and rescue facs avail 2400-0700 on 1 hr req to NAS. (5-30)

BROOKLEY AFB (MOBILE)-TOWER: USAF GCA inop. (9-14) FLD: Rnwys under const 0700-1630, Mon - Fri. (10-5) Acft making VFR descent to Brookley under low visibility conditions will letdown S of Mobile to avoid Bates Fld and G-6 Arwys Tfc. (10-18)

All turns when taxying off lgt plane strip made toward twr. Hvy acft use main rnwys, taxi strips only, making tfc pat W of fld at 1000'. (7-11)

WASHINGTON: SEATTLE NAS: Acft in tfc are rstd from flgt over the area W of a centerline of Rnwy 14-32. Rgt hand tfc when lndg Rnwy 32. Rnwy 14-32 lgtd 30 min prior to arrivals between sunset and sunrise and on req. (6-23)

★SEATTLE-TACOMA INTERNATIONAL ARPT-TOWER: CAA lclzr 110.3 mc comm Dec 15 at new lctn: 2110' N Rnwy 34 serving Rnwy 34 from apch from S to N. FLD: Equip on fld. (9-21)

SPOKANE-RADIO: Omnirng crs have wide crs roughness with signal fades or surges. (10-13)

SPOKANE-FELTS FLD: Take-off and lndgs will be made on rnwy most nearly aligned with wind cone S side of fld. When wind cone points 90° to rnwy, take-off and lnd to the W. Lgt acft use rectangular tfc pat and mrkd area S of rnwy. Equip on fld. (10-9)

SPOKANE-GEIGER FLD: Taxiway between Rnwy 2 and 34 clsd. Equip on fld. (12-13)

★SPOKANE NAS (GEIGER FLD)-RADIO: Navy X-Band radar bcn comm and oper cont. Code: 1-2-1. (12-14)

WHIDBEY ISLAND NAS: Rnwys at Ault Fld are black asphaltic concrete and have a capacity of 25,000 lbs. per wheel if tire pressure is under 85 lbs; or 35,000 lbs. if tire pressure is over 85 lbs. (10-31)

YAKIMA-RADIO: Omnirng radials 176°, usable 35 mi; 336°, 123° 40 mi; 321° 38 mi.

**YAKIMA FIRING CENTER LNDG STRIP: New fld. Lat 46-41-00, long. 120-28-00. (12-15)

WEST VIRGINIA: CHARLESTON-KANAWHA CO. ARPT: Tfc on SW and SE ends of loading ramp and NG hangar area not ctld by twr. Equip SE side Rnwy 5-23, and crossing Rnwy 14-32 days, mrkd. Hazard bcns lctd each end Rnwy 14-32 oper on test basis. (10-23)

ELKINS-RADIO: Omnirng radials from 40° thru 90° to 200° usable dist 40 mi. (6-30)

MORGANTOWN-RADIO: LF rng gnd-checked only. (11-21)

PARKERSBURG-RADIO: SW course VHF visual-aural rng slightly rough. (6-23)

WHEELING-OHIO-CO. ARPT: Turf area clsd (const). Equip on fld days. Use rnwys, taxiways only. (10-7)

WISCONSIN: DRUMMOND-SORENSEN ARPT: N/S Strip under const. (8-23)

GREEN BAY-AUSTIN-STRAUBEL ARPT: All rnwys, taxiways plowed. Braking action fair. (12-15)

LA CROSSE-RADIO: Omnirng radials between 314° and 331° unreliable 20 to 30 mi from rng.

MADISON ARPT: Equip on fld days. Sod unsafe. Due to non-visibility twr unable to ctl, tfc on SE ramp. (10-11)

MILWAUKEE-GENERAL MITCHELL FLD: Formation take-offs prohibited on all rnwys except 1-19, which will be allowed by ctl twr. Rgt turn procedure rstd to locally based acft. Rnwy 18-36, 2300' long open to lgt acft days only. (11-28)

**NEW GLARUS, BCN SITE 12, CHI-MSP: Nov 24 site discontd. (11-28)

WAUTOMA ARPT: Apch clearing not completed. (10-13)

WYOMING: CASPER-RADIO: Omnirng radials between 10° and 35° from stn unusable at min. inst alt. beyond 35 mi.

**GLENDO, BCN SITE 9, CYS-GTF: Dec 9, bcn changed to 12 rpm. (12-11)

LARAMIE-RADIO: About Jan 9, all transmitting and rcvg fac at INSAC will be shut down. During this period, LF rng will oper unmonitored and without voice. (12-14)

MOORCROFT-RADIO: Omnirng radials between 100° and 320° unusable beyond 30 mi at 9000' MSL. (8-8)

ROCK RIVER-RADIO: About Dec 18, until approx Dec 23, Laramie INSAC will be shut down. During this period, Rock River Omnirng will oper unmonitored and without voice. (11-10)

ROCK SPRINGS-RADIO: LF rng crs monitor. device inop. (11-20)

SHERIDAN CO. ARPT: Equip on fld days. (10-6)

**SLATER, BCN SITE 5, CYS-GTF: Dec 9, bcn changed to 12 rpm. (12-11)

(OVER)

(12-19-50)

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum for immediate requirements. As soon as the charts are available for distribution a second notice will appear in this publication.

Aroostook	Nashville	24DF	Dayton local
Burlington	WAC 219	25DF	Pittsburgh local
Huntington	WAC 264	Chicago local	FC 225
Lewiston	WAC 265	Cleveland local	FC 226

NOTE: A NEW EDITION OF WAC 406 WILL BE PRINTED EARLY IN JANUARY; AND A NEW EDITION OF RENO SECTIONAL, IN FEBRUARY. BOTH OF THESE CHARTS WILL, THEREFORE, BE OMITTED FROM THE MARCH SCHEDULE.

A new edition (or new chart) of the charts listed below which make former prints obsolete is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION".

G C A A V A I L A B L E: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO PILOTS AT CIVIL AND MILITARY AIRPORTS IN ACCORDANCE WITH THE FOLLOWING:

CAA GCA UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest GCA.

AIR FORCE GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective AFB.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call nearest air traffic control facility requesting GCA and further instructions.

Contact under VFR: VFR check-out training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, Air Force towers may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at pilot's discretion.

No AF unit can transmit directly on tower low frequency. In addition to frequencies listed below, Air Force GCA emergency VHF transmissions are made on 121.5 mc.

NAVY GCA UNITS- Available to civil pilots in emergency or by prior arrangement with C.O. of respective NAS or MCAS.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility or associated station control tower.

Contact under VFR: VFR check-out training flights by prior arrangement with the C.O. of respective station.

Most Navy GCA units can transmit instructions on tower low frequency. In addition to frequencies listed below, Navy GCA emergency transmissions are made on 121.5 mc.

NOTE: Air Force and Navy GCA units require twenty (20) to thirty (30) minutes for warming up outside of scheduled hours of operation. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

LEGEND

G/T = Guards all frequencies on which station transmits. "G/T except 3295" indicates transmitting frequency 3295 kc not guarded.
HF = 3475,4890,6640 kc.
# = Guards all VHF frequencies station transmits.
(E) = Emergency use, as 121.5 (E).
** = Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.
* = Air Force guard 4495,4765 kc and 121.5 mc
(D) = Day. (N) = Night.
→ = New or revised data.
✓ = New facilities or name changes, see page 3.

INSTRUMENT LANDING SYSTEMS

GP = Glide Path
L5 = Instrument Approach (neon)
L7 = Hi-intensity Approach Lgts
(W) = Without voice

→ = New or revised data
+ = additional data will be found in Notices to Airmen section.
(BC-unusable) = Back course unusable

AIR NAVIGATION RADIO AIDS

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

NOTE: See OMNIRANGE USE, page 79.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continusouly by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
✓ = New facilities or name changes, see page 20
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . .Approach Control Tower, CAA
B. . . . .Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . .Control Tower, CAA
CA. . . .Control Tower, Air Force
CI . . . .Control Tower (City, County, Private, etc.)
CN. . . .Control Tower, Navy
D. . . . .Distantly controlled
FM. . . .VHF fan marker (100 watts)
GCA. . .Ground Controlled approach system
H. . . . .Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . .Non-directional radio beacon (Homing), power 2000 watts or more
ILS. . . .Instrument Landing System (voice on localizer channel)
IM . . . .VHF boundary marker
J. . . . .L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . .VHF fan marker, low powered (5 watts)
LMM . .Compass locator station when combined with middle marker of ILS
LOM. . .Compass locator when installed at outer marker site or within 5.5 miles of middle marker
MH . . . Non-directional radio beacon (homing) power less than 50 watts
ML . . . Range (loop radiators), power less than 50 watts
MM. . . VHF middle marker
MOR. . Low frequency omni-directional range
MRA. . .Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . .Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . VHF outer marker
P. . . . .Point-to-Point radio
RA. . . .Range (adcock, vertical radiators), power 150 watts or more
RL. . . .Range (loop radiators), power 150 watts or more
S. . . . .Simultaneous (range signals and voice) type of transmitter
T. . . . .Teletype
TX. . . .Principal teletype
V. . . . .Additional VHF voice feature on other than range frequency
VAR. . .Visual-aural VHF range
VOR. . .Omni VHF omni-directional range (omni-range)
W. . . . .Without voice facilities
Z. . . . .VHF station location marker at a range station

FREQUENCY LEGEND

V = 140.58 and 111.1 mc transmitted.
\# = Guards same VHF frequencies station transmits except 111.1 mc.
(1) = 3105,4495 kc guarded
(2) = 3105, 4495kc; 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7,140.58 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-140.58,122.1 = guards every frequency in group (3) except 140.58 and 122.1
(3),6210-140.58 = guards 6210 plus every frequency in group (3) except 140.58

NOTES

1. Range courses are magnetic in-bearings.
2. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
3. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
4. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U.S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitvity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-Air Force	CG	-Coast Guard	MG	-Misc. Govt
A	-Army	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
				P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

aw - airway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Strip lights or portable runway lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway
- 5 - Instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:

F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.
Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular.

FUEL OCTANE (cont.)

Air Force and Navy Fuel:

A+: 115/145 oct.
A : 100/130 oct.
B : 91/98 oct.
C . 73/80 oct.
J : JP - 1
J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U.S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(c) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "+" indicates additional data in Notices to Airmen Section.

(k) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(l) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

NOTICES TO AIRMEN

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

✓ Effective January 1, 1951, all Navy range stations, control towers and GCA units in the continental United States, discontinued the use of 3117.5 kc.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U. S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", A. F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A.F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

SPECIAL NOTICES

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY AND COAST GUARD: Listed below are Standard VHF Channels for the Air Force, Navy and Coast Guard.

AIR FORCE*	NAVY ARC-1** receivers	NAVY ARC-3, -5 SCR-522***	COAST GUARD	SERVICE
				CAA Airway (Range Station)
A...140.58	1...140.58			
		A...121.5	1...121.5	Military Emergency
B...126.18	2...142.74	B...142.74	2...142.74	Control towers
C...137.88	3...132.3	C...132.3	3...132.3	Military Airways (137.88 secondary use USAF control towers)
D...121.5				Military Emergency
		D...140.58	Grd D...140.58	CAA Airways (Range Station)
E...( )	4...( )	E...( )		Tactical or as required
			4...118.1	International airdrome control towers
F...( )	5...( )	F...( )		Tactical or as required
			5...143.28	General Communications
G...136.80	6...143.64	G...142.02	6...143.64	GCA
H...134.1	7...142.02	H...134.64	7...142.02	GCA
	8...134.64		8...134.1	GCA
	9...126.18		9...126.18	Control towers
Guard.....121.5				Military emergency
U...108.3				ILS localizers and VAR Ranges
V...108.7				"
W..109.1				"
X...109.5				"
Y...109.9				"
Z...110.3				"

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**This frequency plan is effective upon completion of modification AN/ARC-1 guard channel in accordance with BuAer Technical Order to permit tuning to 121.5 mc. Prior to completion of this modification, 140.58 mc for CAA Airways will be carried in guard channel of AN/ARC-1 equipment, and 121.5 mc in Channel 1.

***In 4 channel equipment (ARC-5 and SCR-522) 126:18 mc or 142.02 mc may be substituted on Channels C and D in accordance with operational requirements.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U. S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37, AIR FORCE REGULATION 60-16, JULY 11, 1949".

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 thru 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

✓ Indicates new or revised Special Notices

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U. S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Travis AFB, California.

BERMUDA: Mitchel AFB, N. Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Travis AFB, Calif.,; or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D. C.; Selfridge AFB, Mich.; or Westover AFB, Mass.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Texas; Brookley AFB, Ala.; Washington National Airport, D. C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Texas; MacDill AFB, Fla.; Washington National Airport, D. C.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Airport, D. C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Travis AFB, California.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D. C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide", published by MATS and now distributed to all Air Force bases should be consulted prior to departure for foreign clearing stations, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following publications are now distributed in accordance with AF Regulation 5-12, and supersede listings given in paragraph 5 of this Regulation. Base operations officers, weather and communication units, should check copies in use to insure that latest issues and all revisions are available. Mailing lists are now maintained in accordance with groupings of material as follows:

GROUP I MATERIAL: II-B. Instructions for the Operation of Communications Facilities, First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8 and II-B-11).

GROUP II MATERIAL: Location Identifiers, Fourth Edition, July 1, 1950, with two revisions.

GROUP III MATERIAL: Contractions, Fourth Edition, December 1, 1949.

GROUP IV MATERIAL: Civil Airways Mileage Chart of June 14, 1950.

GROUP V MATERIAL: Teletype Service "A" Manual, September 19, 1950; Teletype Service "C" Manual, August 8, 1950; Teletype Maps: M-11, December 1, 1949, and M-14 April 15, 1950 (Service "A"); M-10, October 1, 1949, and M-13, November 1, 1950 (Service "C"); M-58, August 15, 1950 (Service "A", "C" and "O"); M-59, November 5, 1949 (Service "B").

GROUP VI MATERIAL: Teletype Service "O" Manual, May 1, 1950, with 6 revisions; Teletype Maps M-89, February 1, 1950 (Service "O") and M-58 (Service "A", "C" and "O").

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Headquarters, USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT-NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

PROVISION OF PLAIN LANGUAGE TERMINAL FORECASTS: All CAA communications facilities now provide Air Force pilots with terminal forecasts in plain language upon request. Terminal forecast information for all Air Force bases and for Patuxent River Naval Air Station, Maryland, will be available. Pilots should make full use of this service in requesting weather information.

IMPLEMENTATION OF 136.80 MC IN CHANNEL "G": Use of 136.80 mc to replace 137.70 mc as GCA Search Control Frequency in "G" Channel was implemented December 1, 1950. Frequency 137.70 mc was retained in GCA units for a period of 30 days after implementation of 136.80 mc. Frequency 136.80 mc was implemented at VHF/DF stations within the continental U. S., replacing 137.70 mc on December 1, 1950, and will be used on a secondary basis as a common VHF/DF training frequency. (Where VHF/DF and GCA facilities are within interference rng of each other, routine navigational VHF/DF aid will be furnished on Channel G on a secondary basis, emergency VHF/DF aid will be on 121.5 mc, and tactical or training frequencies avail. will be used whenever possible. Pilots and operators engaging in VHF/DF training will monitor G channel before transmitting so as not to interfere with GCA transmission.) Secondary uses of 137.70 mc by tactical organizations will be conducted on 136.80 mc after implementation.

SPECIAL CHARTS OF ATOMIC ENERGY AIRSPACE RESERVATIONS: The Atomic Energy Commission has issued a special chart depicting airspace reservations in the United States. Copies of this chart are being supplied each Air Force Base, AF Reserve Unit, National Guard Unit and other activities on the same mailing list basis as used for Airman's Guide. Operations officers should prominently display this chart and assure that pilots contemplating flight adjacent to these areas are briefed upon their existence, location and restricted status.

✓CHANGES FOR AN 08-15-2: Page 39. Delete the following under Classes of Distress: "There are three basic classes of distress signals. 1. Safety: Use this procedure when you are uncertain of your position or when you expect an emergency, but when you can proceed, or can land at a suitable field with the aid of a ground station. On CW, use the International Safety signal, TTT. On voice, use the word SECURITY." Substitute therefor: "There are three basic classes of distress signals. 1. Safety: When the pilot of an aircraft is uncertain of his position or is expecting a state of emergency, but with the aid of ground stations can proceed on a course or land at a suitable airfield, he will call the ground station using normal procedure. If the pilot is unable to contact the ground station or does not know what station to call, he will use the international safety signal "TTT" on radiotelegraph (CW) and/or "SECURITY" on radiotelephone (Voice)."

✓CHANGES FOR USAF PILOT'S HANDBOOK, SPECIAL JET U. S.: X-JAL-19. Jacksonville, Fla., Imeson Arpt. Missed approach procedure: If not VFR at 2000', make standard rate left turn to heading 179° intercept W crs of Jacksonville rng, turn to heading 89° and call Jacksonville apch ctl for further instructions.

✓CHANGES FOR PILOT'S HANDBOOK (WEST) U. S.: (1) Larson AFB, Wash. The following procedure is authorized, utilizing the Ephrata rdo rng, freq. 269 kc, ident: EPH. Field elev: 1190', ceiling: 700'; min alt over fld: 1890'. Initial apch altitudes: North - minimum enroute altitude; East - 5000' from Spokane rng; 3500' from Harrington FM; South - minimum enroute altitude; West - 7000' from Ellensburg Rng. Final apch course: West. Procedure turn: S side W crs, 2500' within 10 miles; 3000' within 25 miles. Alt over rng on final apch: 2200'. Bear and dist, stn to fld: 88°, 8.7 miles. If visual ctc not estab. at authorized landing minimums within 0 miles after passing Ephrata rdo rng, or if landing not accomplished, climb to 3500' on E crs.

(2) McChord AFB, Tacoma, Washington. Initial apch altitude from N, 3000' from intsxn NW crs Seattle; 2000' from intsxn NE crs Shelton; East 8000' from intsxn W crs Ellensburg. Minimum altitude over McChord rng on final apch: 2000'.

(3) AL 160 dtd June 16, 1950. Carswell AFB, Texas. Mag heading Ft. Worth rng to arpt 217°, dist Ft. Worth rng to arpt 7.0 mi. Elev: 634' MSL. Missed apch - climb to 2000' on a heading of 217°.

(4) AL 174 dtd April 7, 1950. San Diego NAS, Calif. Initial apch: E - 9000' from ELC rng, 6000' from Barrett Lake FM, 3600' from Jamul "H", 1500' from Lemon Grove FM.

CHANGES FOR PILOT'S HANDBOOK (EAST) U. S.: (1) AL-418 dtd July 29, 1949. MacDill AFB, Fla. Initial apch SE 1300' MSL from int NE crs Ft. Meyer rng. Alternate missed apch procedure (when directed by ARTC) climb to 1300' on SE crs.

(2) AL-146 dtd Nov 2, 1950. Lawson AFB, Columbus, Ga. Change distance rng stn to arpt to 3.3 miles. Instrument rnwy 2 now 5900', all usable.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearance include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

CIVIL SPECIAL NOTICES

CIVIL DATA: The airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible, the items should be reported directly to the Office of Aviation Development, Attention: W-155, C.A.A., Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Notices to Airmen Section.

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in or over Canadian territory.

INSTRUCTIONS FOR MONITORING ILS: Communications should be established with the appropriate control tower or with the communications stations where there is no control tower prior to starting an ILS approach. This is in order to receive advisory information as to the operation of the facility. It is also recommended that the aural signal of the ILS be monitored during an approach to assure continued reception and receipt of advisory information.

OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereat.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitation, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions of short duration) carried in the Notices to Airmen Section are facility coordinates, post-deadline data, or data impossible to incorporate in the two above tabulations.

DIRECT COMMUNICATIONS WITH AIR ROUTE TRAFFIC CONTROL CENTERS: The CAA has inaugurated a procedure whereby pilots operating on IFR flight plans may have direct communication with air route traffic controllers at certain control centers. VHF on a simplex basis (call-up and reply on the same frequency) is used. This enables the controller to issue traffic clearances and receive indications of complicance therewith in such a manner that all air traffic is expedited. The center will guard the assigned frequency. However, each specific aircraft, with which the center desires to establish direct communication for control purposes, will receive a clearance through the appropriate CAA, AACS or Air Carrier Communications Station, indicating the time or place the controller desires to communicate directly with the pilot.

The following locations at which this direct communications procedure is available are also listed in the Air Navigation Radio Aids Section of the Airman's Guide. Each one is listed alphabetically following the tower listing. When additional locations establish this procedure they will be similarly listed.

Radio Call	Frequency	Commissioned
Oakland Center	120.3 mc	October 30, 1950
Chicago Center	119.5 mc	May 10, 1949
Washington Center	120.3 mc	September 1, 1949
New York Center	120.7 mc	January 25, 1950
	120.3 mc	October 11, 1950
Atlanta Center	120.7 mc	July 1, 1950
Pittsburgh Center	118.7 mc	November 2, 1950
Detroit Center	119.1 mc	December 21, 1950

DANGER AREA DESIGNATIONS: The following Danger Area amendments are effective as dated, unless otherwise advised:

AMENDMENT NO. 60 (Jan. 2, 1951)

1. A Camp Gordon, Georgia, area is added to read: Location: Camp Gordon (Savannah Chart); Description: Beginning at lat. 33°23'35"N, long. 82°08'30"W; S to lat. 33°22'15"N, long. 82°08'18"W; SW to lat. 33°16'20"N, long. 82°18'00"W; WNW to lat. 33°17'29"N, long. 82°23'00"W; NE to lat. 33°21'15"N, long. 82°18'47"W; NE to lat. 33°25'00"N, long. 82°12'00" W; ESE to lat. 33°23'35"N, long. 82°08'30"W, point of beginning; Altitudes: Surface to 5000'; Time: 0700 to 1900, Monday through Saturday; Using Agency: Commanding General, Camp Gordon, Georgia.

2. The Fort Lewis, Washington, area, published on June 23, 1949, in 14. F. R. 3393, is revised to read: Location: Fort Lewis (Seattle Chart); Description: Beginning at a point on Highway US 99 at lat. 47°06'35"N, long. 122°34'05"W; Southeasterly along road to Northern Pacific RR at lat. 47°05'22"N, long. 122°30'15"W; Southerly along railroad to town of Rainier, Washington at lat. 46°53'12"N, long. 122°41'15"W; northwesterly along road to road junction at lat. 46°57'12"N, long. 122°46'47"W; due N to Northern Pacific RR

at lat. 46°59'52"N; northeasterly along railroad to Highway US 99 at lat. 47°05'00"N, long. 122°40'04"W; northeasterly along highway to lat. 47°06'35"N, long. 122°34'05"W, point of beginning; Altitudes: Surface to unlimited; Time: Continuous; Using Agency: Fort Lewis, Washington.

AMENDMENT NO. 61 (January 10, 1951)

3. A Camp Breckinridge, Kentucky, area is added to read: Location: Camp Breckinridge (Nashville Chart); Description: Beginning at Corydon, Ky. at lat. 37°44'30"N; long. 87°42'30"W; Southerly to Dixie, Ky. at lat. 37°41'00"N, long. 87°41'00"W; SE to Poole, Ky. at lat. 37°38'30"N, long. 87°39'00"W; SW to Tilden, Ky. at lat. 37°36'30"N, long. 87°41'30" W; NNW to Boxville, Ky. at lat. 37°37'30"N, long. 87°49'30"W; NW to Morganfield, Ky. at lat. 37°41'00"N, long. 87°55'00"W; ENE to Waverly, Ky. at lat. 37°42'45"N, long. 87°44'00" W; ENE to Corydon, Ky. at lat. 37°44'30"N, long. 87°42'30"W, point of beginning; Altitudes: Surface to 11,000'; Time: Continuous; Using Agency: 101st Airborne Division and Camp Breckinridge, Kentucky.

✓ AMENDMENTS TO CIVIL AIRWAYS: Effective January 1, 1951, Amber Civil Airway No. 1 is amended in part as follows: Amber civil airway No. 1 (United States-Mexican Border to Nome, Alaska).....Toledo, Wash. rdo rng stn. Add: excluding the Fort Lewis, Wash. danger area.

Effective January 8, 1951, unless otherwise advised, civil airways are amended in part as follows:

(1) Green civil airway No. 5 (Los Angeles, Calif. to Boston, Mass.) Smithville, Tenn. rng; .....the intsxn of the SE crs of the Smithville, Tenn. rng and the W crs of the Knoxville, Tenn. rng.....Knoxville, Tenn. rng.

(2) Red civil airway No. 21 (Pittsburgh, Pa. to Boston, Mass.).....The Selinsgrove, Pa. non-directional rdo bcn. From the Williamsport, Pa. rng to the Newark, N. J. rng.....From the intsxn of the E crs of the New York (La Guardia), N. Y. rng and the SW crs of the Bridgeport, Conn. rng.....

(3) Red civil airway No. 8 (Dayton, Ohio to Williamsport, Pa.) Caption change.

✓ AIR ROUTE TRAFFIC CONTROL AND FLIGHT ADVISORY BOUNDARY REVISIONS: Effective January 15, 1951, unless otherwise advised, the Fort Worth - St. Louis Air Traffic Control and Kansas City Flight Advisory Area Boundary will be amended as follows:

(1) ST. LOUIS - FORT WORTH air route traffic control boundary will be established 50 miles S of Van Buren H marker. Concurrently with the above, the ST. LOUIS - FORT WORTH flight advisory area boundary will be revised as follows: From a point 65 miles SW of Tulsa on the E side of Blue Airway No. 70 to a point 50 miles S of Van Buren H marker on the W side of Blue Arwy No. 13, thence at right angles to the E side of Blue Airway No. 13, thence to a point 25 miles NE of Texarkana on the N side from Green Airway No. 5.

(2) KANSAS CITY Flight Advisory Area boundary will be established as follows: A line running from the Fort Worth - Kansas City control area boundary on Blue Airway No. 5 direct to the VOR Kansas City - St. Louis Control Area boundary on Blue Airway No. 22.

✓ NON-STANDARD HOLDING PATTERNS: Effective immediately the following non-standard holding patterns are established:

(1) Holding Point - McChord rng; Direction from Holding Point: S; Direction of Turn: LEFT on W side of S crs; Time: Two minutes.

(2) Holding Point - Mt. Union Intsxn; Direction from Holding Point - West; Direction of Turn - Right on N side of E crs of Altoona, Pa.

✓ COMPULSORY REPORTING POINT: Effective January 1, 1951, unless otherwise advised, the following compulsory reporting point is established: NEW BRUNSWICK INTSXN The intsxn of the E crs Allentown rng and SW crs Newark rng.

✓ ON-REQUEST REPORTING POINT: Effective immediately, the CAMERON on-request reporting point is established at intsxn of the S crs of the Des Moines, Iowa and the E crs of St. Joseph, Mo. rng.

✓ CORRECTIONS TO AERONAUTICAL CHARTS: (1) Correct RF Chart No. 106, dtd November 29. 1950 by changing the minimum altitude between Gulkana, Alaska and Big Delta, Alaska to read 13,000' instead of 3000'.

(2) Correct RF Chart Nos. 35 and 35A by deleting transmitting and receiving facility 140.58 mc at Arcola, Va., Andrews, Md., Largo, Md. and Washington, D. C.

(3) Correct RF Chart No. 35A, Quantico MCAS, Va, by deleting the word range and substituting field. Field operates 0800 to sunset and on 2 hrs request prior to sunset.

WEATHER REPORTING SERVICE

These notices are being discontinued on a trial basis since it is believed a requirement no longer exists for publication of this information in the "Airman's Guide". Subscribers wishing the notices resumed should write to the Chief, U. S. Weather Bureau, Washington 25, D. C., Attention: Synoptic Section. If the demand and justification for reinstatement of the notices are sufficient, appropriate action will be taken.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.
** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.
★ - New or revised radio data to be inscribed on charts or added to records.
NOTE: Because of space limitations such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

[redacted]: ALBERTVILLE ARPT: 200' NW end NW/SE Strip ruf. (11-15)
ANNISTON ARPT: Ctn - strips being extended. (9-26)
BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. Taxi with ctn thru intsxn Rnwy 6-24 and black top rnwy, two high intensity rnwy lgts are lctd in center of black top rnwy. AIR DEFENSE IDENTIFICATION ZONES (ADIZ)

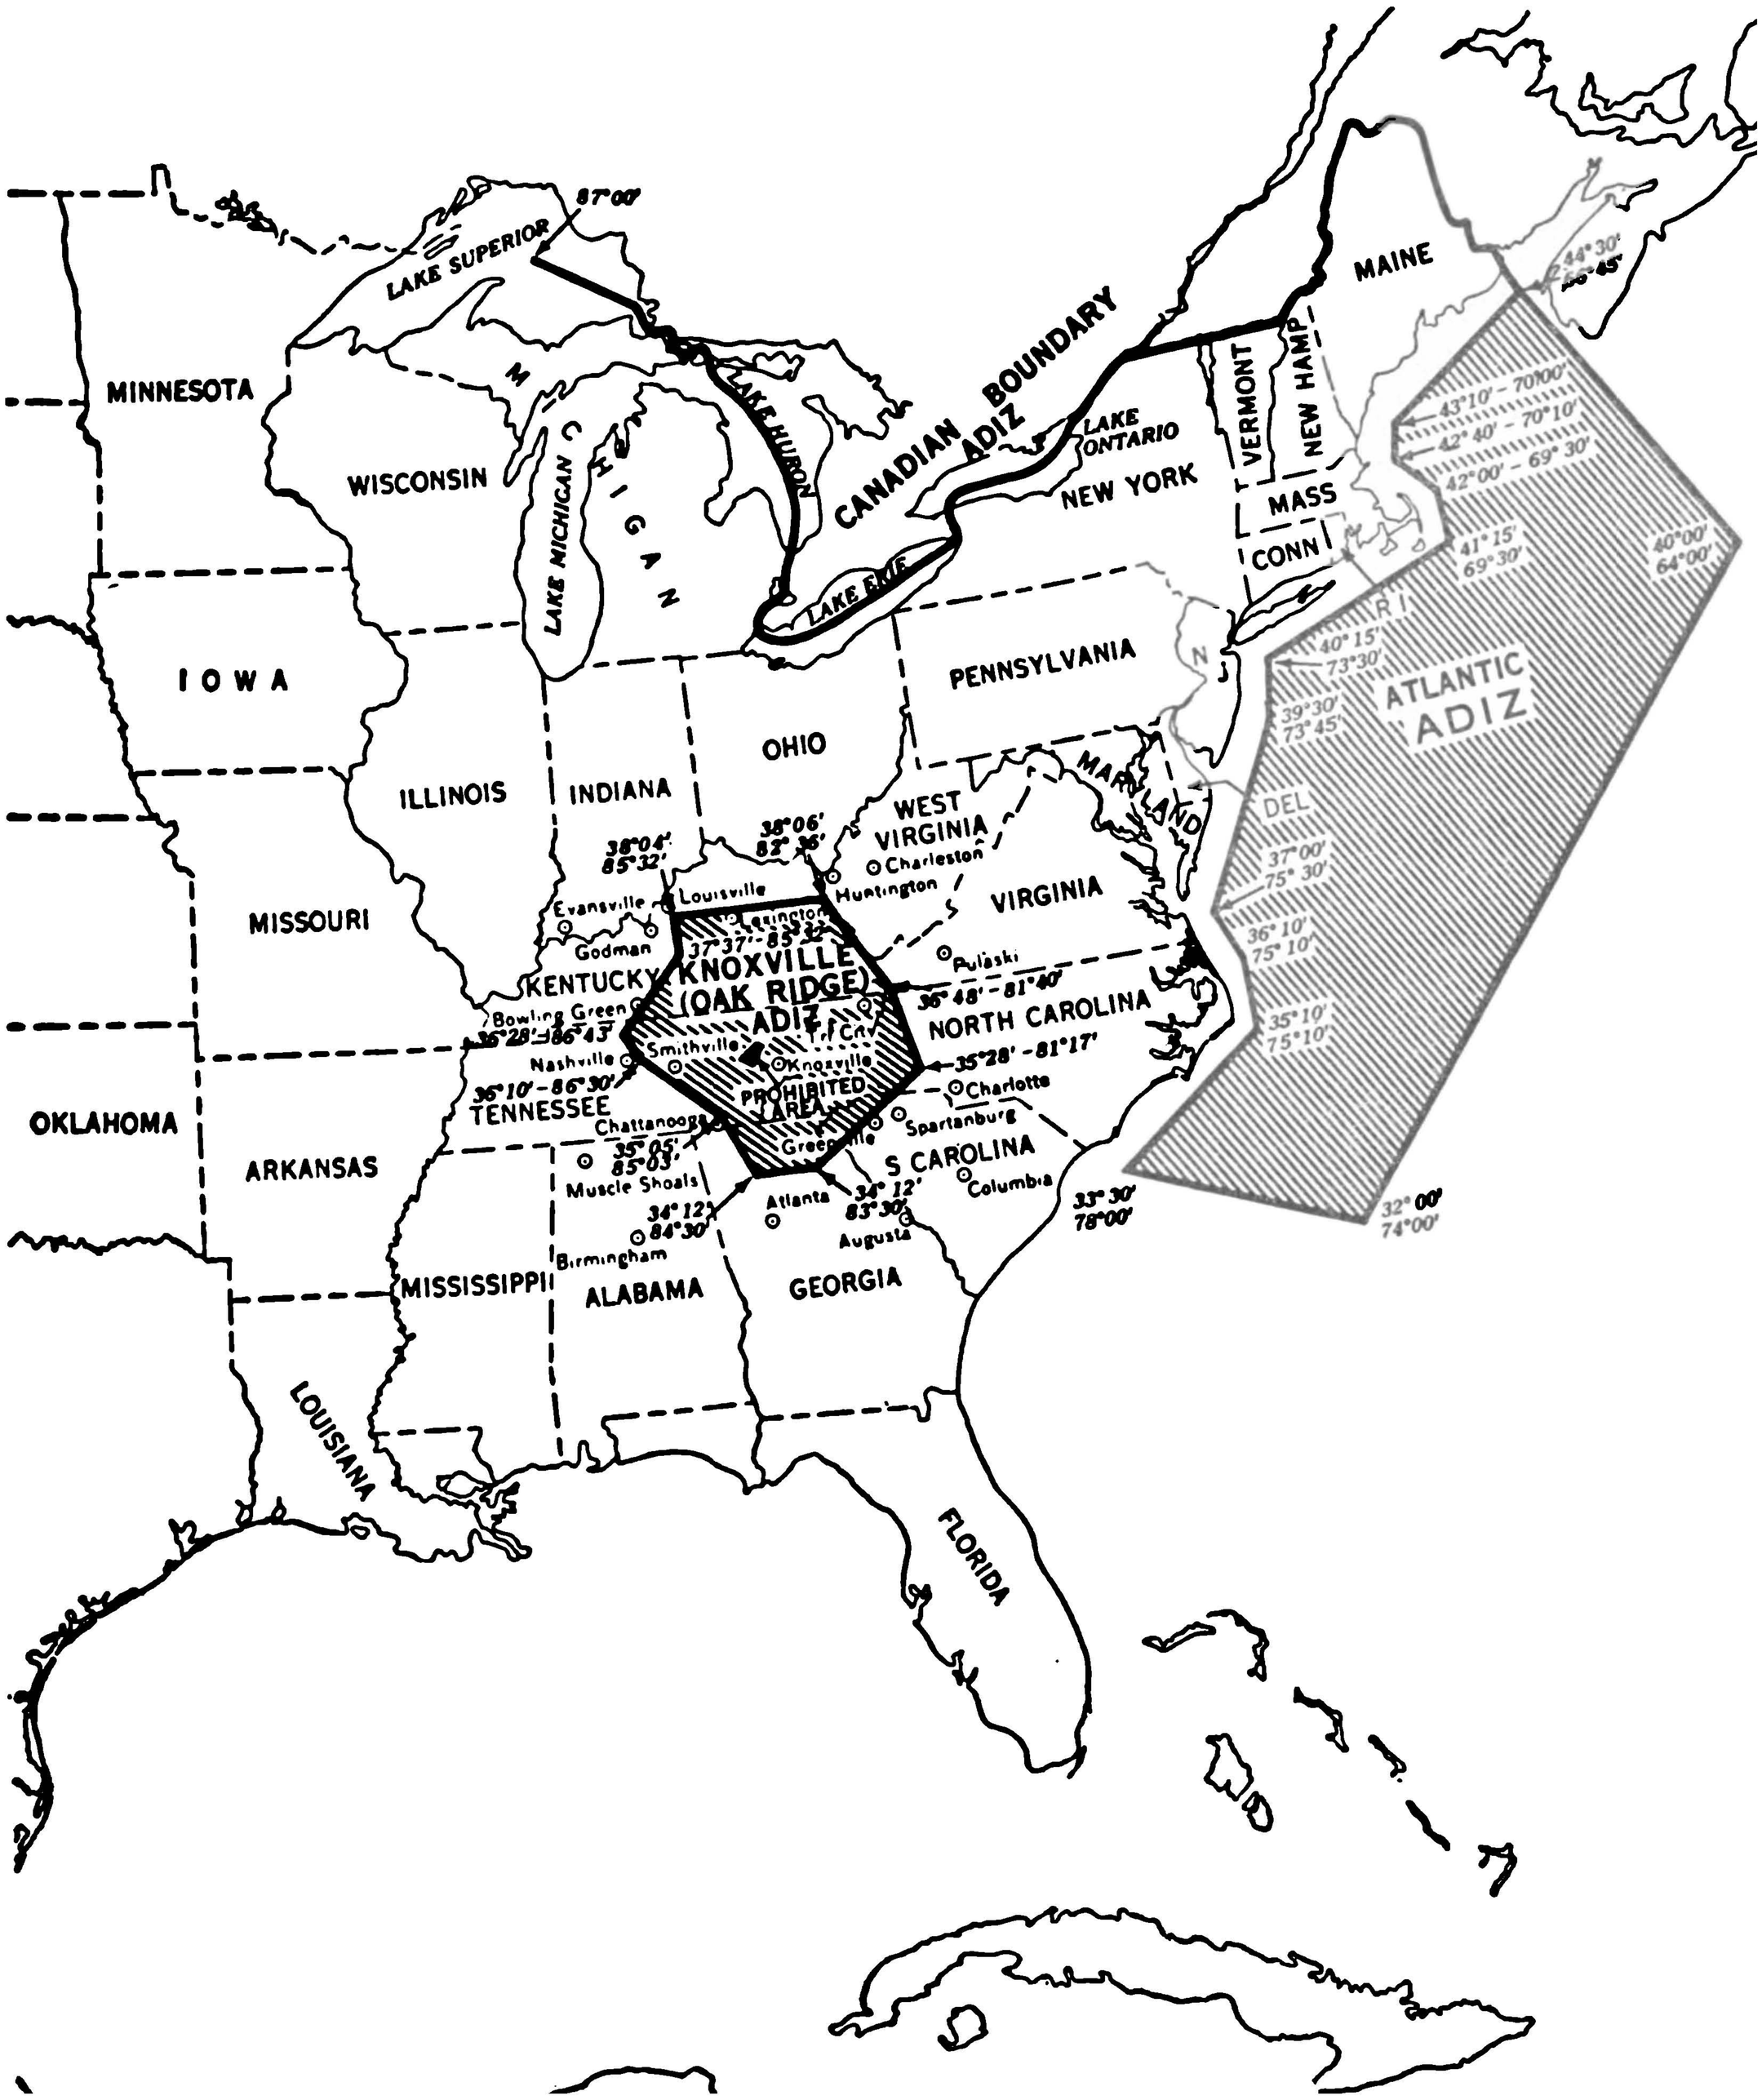
DESIGNATED BY THE ADMINISTRATOR OF CIVIL AERONAUTICS



REGULATIONS OF THE ADMINISTRATOR
PART 620 - EFFECTIVE DEC. 27,1950
SECURITY CONTROL OF AIR TRAFFIC

The regulation reads in part as follows.....

SUBPART B - OPERATING RULES

620.10 Scope. Aircraft shall not be operated into or within an Air Defense Identification Zone (ADIZ) prescribed by the Administrator in Subpart C of these regulations, in violation of the following rules:

620.11 Flight Plans. Unless otherwise authorized under section 620.13, prior to penetrating and ADIZ or prior to take-off from a point within an ADIZ, a flight plan shall be filed with an appropriate aeronautical facility. Such flight plan shall contain:

(a) For IFR flights, the information specified in section 60.41 of the Air Traffic Rules of Part 60 of the Civil Air Regulations. (14 C.F.R, Part 60).

(b) For VFR flights, unless an abbreviated flight plan is authorized the information specified in paragraphs (a) through (g) inclusive and (i) and (j) of Section 60.41 of the Air Traffic Rules. (14 C.F.R., Part 60). Such a flight plan shall be designated by the pilot in command as a Defense Visual Flight Rule (DVFR) flight plan.

620.12 Reporting Points

(a) Flight within or penetrating a Domestic ADIZ or entering the United States across an International Boundary ADIZ - Unless otherwise authorized under section 620.13:

(1) IFR Flights - Position reports shall be made as required by Section 60.47 of the Civil Air Regulations. (14 C.F.R., Part 60).

(2) DVFR Flights - The pilot in command of an aircraft shall not enter an ADIZ until he has reported to an appropriate aeronautical facility either (a) the estimated time, position and altitude at which he will penetrate the ADIZ or (b) the time, position and altitude at which the aircraft passed the last reporting point along the flight path of the aircraft prior to penetration of an ADIZ and his estimated time over the next reporting point along the intended flight path of the aircraft.

NOTE: Whenever it shall appear that the previously filed estimate is in error, as to time by more than five minutes, or as to position by more than 20 miles, a corrected estimate shall be filed with an appropriate aeronautical facility.

(b) Aircraft entering the United States through a Coastal ADIZ:

(1) United States aircraft - The reports prescribed in paragraph (a) of this section are required.

(2) Foreign aircraft - Prior to entering the United States, Foreign aircraft shall (A) make position reports as prescribed for United States aircraft in paragraph (1) above or (B) in lieu thereof, the pilot in command of a foreign aircraft operating under either Instrument of Visual Flight Rules shall report to an appropriate aeronautical facility when the aircraft is not less than one hour and not more than two hours average cruising distance via the most direct route, from the United States. Thereafter, reports shall be made as instructed by the facility receiving the original report.

NOTE: Operators of foreign aircraft who exercise the optional position reporting method described in subsection (B) above are cautioned that this procedure does not eliminate the position reporting requirements prescribed for the control of air traffic.

620.13 Authorized Exceptions:

(a) Intra-Zone VFR flights. A CAA airways operation facility exercising security control may, under certain conditions, authorize VFR flights which are wholly within the boundaries of an ADIZ, or from points within an ADIZ to points outside thereof, without compliance with the flight plan and reporting requirements of sections 620.11 and 620.12. Such flights shall be operated in accordance with the instructions, if any, issued at the time the authorization is granted.

(b) Altitude Limitations. The provision of sections 620.11 and 620.12 are not applicable to aircraft operating within the Knoxville, Albuquerque, Los Angeles, San Francisco and Northwest Air Defense Identification Zones at altitude less than 4,000 feet above the immediate terrain or to aircraft entering these same Air Defense Identification Zones from within the continental limits of the United States at altitudes less than 4,000 feet above the immediate terrain.

620.14 Air Defense Security Instructions. Under emergency defense conditions which may involve the national security, aircraft shall be operated into or within an ADIZ in accordance with such additional special security instructions issued by the Administrator as may be deemed necessary for the identification, location and control of the particular flight.

NOTE: Such instructions will be designated as "Air Defense Security Instructions." Emergencies involving the national security may require the exercise of special control for identification purposes. In such cases instructions may be issued requiring identification turns, flight in a specified direction or location, or such other instructions as may be necessary.

620.15 Adherence to DVFR Flight Plans and Air Traffic Clearances

(a) IFR Flights -

(1) Within Control Zones and Areas - No deviation shall be made from an IFR flight plan unless an amended clearance is obtained from CAA air traffic control through an appropriate aeronautical facility as provided in the air traffic rules, section 60.21 of the Civil Air Regulations (14 C.F.R. 60, as amended).

(2) Outside Control Zones and Areas - When a flight is conducted in accordance with IFR within or into an ADIZ where an air traffic clearance is not required by the Civil Air Regulations, no deviation from the flight plan, as filed, shall be made unless prior notification is given to an appropriate aeronautical facility.

(b) DVFR Flights - No deviation shall be made from a DVFR flight plan unless prior notification is given to an appropriate aeronautical facility.

620.16 Emergency Situations. In emergency situations which require immediate decision and action for the safety of the flight, the pilot in command of the aircraft may deviate from the provision of this part to the extent required for such emergency. When a deviation is exercised the pilot in command shall report such deviation and the reasons therefor, as soon as practicable to an appropriate aeronautical facility.

620.17 Radio Failure

(a) IFR Flights - In case of the failure of two-way radio communications, the pilot in command of the aircraft shall take the action required by Section 60.49 of the Civil Air Regulations. (14 C.F.R. Part 60 as amended).

(b) DVFR Flights - In case of the failure of two-way radio communications the flight may proceed in accordance with the original DVFR flight plan and the pilot in command of the aircraft shall make a report of such failure, as soon as possible, to an appropriate aeronautical facility.

620.18 Violations. In addition to the penalties otherwise provided for by the Civil Aeronautics Act of 1938, as amended, any person who knowingly or willfully violates any provision of the regulations prescribed in this part, or any order issued thereunder shall be deemed guilty of a misdemeanor and upon conviction thereof, shall be subject to a fine of not exceeding $10,000 or to imprisonment not exceeding one year, or to both such fine and imprisonment.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO PILOTS AT CIVIL AND MILITARY AIRPORTS IN ACCORDANCE WITH THE FOLLOWING

CAA GCA UNITS - Operate continuously, at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest GCA.

AIR FORCE GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective AFB.

Contact under IFR. Pilots desiring GCA assistance during IFR conditions should call nearest air traffic control facility requesting GCA and further instructions.

Contact under VFR: VFR check-out training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, Air Force towers may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at pilot's discretion.

No AF unit can transmit directly on tower low frequency. In addition to frequencies listed below, Air Force GCA emergency VHF transmissions are made on 121.5 mc.

NAVY GCA UNITS- Available to civil pilots in emergency or by prior arrangement with C.O. of respective NAS or MCAS.

Contact under IFR Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility or associated station control tower.

Contact under VFR VFR check-out training flights by prior arrangement with the C.O. of respective station.

Most Navy GCA units can transmit instructions on tower low frequency. In addition to frequencies listed below, Navy GCA emergency transmissions are made on 121.5 mc.

NOTE: Air Force and Navy GCA units require twenty (20) to thirty (30 minutes for warming up outside of scheduled hours of operation Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums

LEGEND

G/T = Guards all frequencies on which station transmits. "G/T except 3295" indicates transmitting frequency 3295 kc not guarded.
HF = 3475,4890,6640 kc.
 # = Guards all VHF frequencies station transmits.
(E) = Emergency use, as 121.5 (E).
**** = Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.**
*** = Air Force guard 4495,4765 kc and 121.5 mc**
(D) = Day. (N) = Night.
→ = New or revised data.
✓ = New facilities or name changes, see page 3.

INSTRUMENT LANDING SYSTEMS

GP = Glide Path
L5 = Instrument Approach (neon)
L7 = Hi-intensity Approach Lgts
(W) = Without voice

→ = New or revised data
+ = additional data will be found in Notices to Airmen section.
(BC-unusable) = Back course unusable

AIR NAVIGATION RADIO AIDS

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

NOTE: See OMNIRANGE USE, page 79.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continusouly by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
V = New facilities or name changes, see page 20
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . Approach Control Tower, CAA (transmits on voice channel of associated L/MF range or ILS in addition to frequencies listed)
B. . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . Control Tower, CAA
CA. . . Control Tower, Air Force
CI. . . Control Tower (City, County, Private, etc.)
CN. . ..Control Tower, Navy
D. . . . Distantly controlled
FM. . . VHF fan marker (100 watts)
GCA. . Ground Controlled approach system
H. . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . Non-directional radio beacon (homing), power 2000 watts or more
ILS . . .Instrument Landing System (voice on localizer channel)
J. . . . L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . VHF fan marker, low powered (5 watts)
LMM. .Compass locator station when combined with middle marker of ILS
LOM. . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
MH. . Non-directional radio beacon (homing) power less than 50 watts
ML. . Range (loop radiators), power less than 50 watts
MM. ..VHF middle marker
MOR.. Low frequency omni-directional range
MRA. . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL .. Range (loop radiators), power 50 or more, but less than 150 watts
OM. . .VHF outer marker
P. . . . Point-to-Point radio
RA. . . Range (adcock, vertical radiators), power 150 watts or more
RL. . . Range (loop radiators), power 150 watts or more
S. . . . Simultaneous (range signals and voice) type of transmitter
T. . . . Teletype
TX. . . Principal teletype
V. . . . Additional VHF voice feature on other then range frequency
VAR. . Visual-aural VHF range
VOR. . Omni VHF omni-directional range (omni-range)
W . . . Without voice facilities
Z. . . .VHF station location marker at a range station

FREQUENCY LEGEND

V = 140.58 and 111.1 mc transmitted.
# = Guards same VHF frequencies station transmits except 111.1 mc.
(1) = 3105,4495 kc guarded
(2) = 3105, 4495kc; 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7,140.58 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-140.58,122.1 = guards every frequency in group (3) except 140.58 and 122.1
(3),6210-140.58 = guards 6210 plus every frequency in group (3) except 140.58

NOTES

1. Range courses are magnetic in-bearings.
2. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
3. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
4. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

DIRECTORY OF AIRPORTS
LEGEND

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U.S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitvity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-Air Force	CG	-Coast Guard	MG	-Misc. Govt
A	-Army	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
				P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

w - allway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting
- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Strip lights or portable runway lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway
- 5 - Instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:
F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.
Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular.

FUEL OCTANE (cont)

Air Force and Navy Fuel:
A+: 115/145 oct.
A : 100/130 oct.
B : 91/98 oct.
C : 73/80 oct.
J : JP - 1
J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U.S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(c) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "+" indicates additional data in Notices to Airman Section.

(k) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(l) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

✓ Effective January 1, 1951, all Navy range stations, control towers and GCA units in the continental United States, discontinued the use of 3117.5 kc.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U. S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", A. F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A.F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

SPECIAL NOTICES

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY AND COAST GUARD: Listed below are Standard VHF Channels for the Air Force, Navy and Coast Guard.

AIR FORCE*	NAVY ARC-1** receivers	NAVY ARC-3, -5 SCR-522***	COAST GUARD	SERVICE
A...140.58	1...140.58			CAA Airway (Range Station)

Guard.....121.5				Military emergency
U...108.3				ILS localizers and VAR Ranges
V...108.7				"
W..109.1				"
X...109.5				"
Y...109.9				"
Z...110.3				"

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**This frequency plan is effective upon completion of modification AN/ARC-1 guard channel in accordance with BuAer Technical Order to permit tuning to 121.5 mc. Prior to completion of this modification, 140.58 mc for CAA Airways will be carried in guard channel of AN/ARC-1 equipment, and 121.5 mc in Channel 1.

***In 4 channel equipment (ARC-5 and SCR-522) 126.18 mc or 142.02 mc may be substituted on Channels C and D in accordance with operational requirements.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U. S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37, AIR FORCE REGULATION 60-16, JULY 11, 1949".

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 thru 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

✓ Indicates new or revised Special Notices

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U. S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Travis AFB, California.

BERMUDA: Mitchel AFB, N. Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Travis AFB, Calif.,; or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Arpt, D.C.; Selfridge AFB, Mich.; Westover AFB, Mass.; Mitchel AFB, N.Y.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Texas; Brookley AFB, Ala.; Washington National Airport, D. C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Texas; MacDill AFB, Fla.; Washington National Airport, D. C.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Airport, D. C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Travis AFB, California.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D. C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide", published by MATS and now distributed to all Air Force bases should be consulted prior to departure for foreign clearing stations, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following publications are now distributed in accordance with AF Regulation 5-12, and supersede listings given in paragraph 5 of this Regulation. Base operations officers, weather and communication units, should check copies in use to insure that latest issues and all revisions are available. Mailing lists are now maintained in accordance with groupings of material as follows:

GROUP I MATERIAL: II-B. Instructions for the Operation of Communications Facilities, First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8 and II-B-11).

GROUP II MATERIAL: Location Identifiers, Fourth Edition, July 1, 1950, with two revisions.

GROUP III MATERIAL: Contractions, Fourth Edition, December 1, 1949.

GROUP IV MATERIAL: Civil Airways Mileage Chart of June 14, 1950.

GROUP V MATERIAL: Teletype Service "A" Manual, September 19, 1950; Teletype Service "C" Manual, August 8, 1950; Teletype Maps: M-11, December 1, 1949, and M-14 April 15, 1950 (Service "A"); M-10, October 1, 1949, and M-13, November 1, 1950 (Service "C"); M-58, August 15, 1950 (Service "A", "C" and "O"); M-59, November 5, 1949 (Service "B").

GROUP VI MATERIAL: Teletype Service "O" Manual, May 1, 1950, with 6 revisions; Teletype Maps M-89, February 1, 1950 (Service "O") and M-58 (Service "A", "C" and "O").

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Headquarters, USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT-NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

PROVISION OF PLAIN LANGUAGE TERMINAL FORECASTS: All CAA communications facilities now provide Air Force pilots with terminal forecasts in plain language upon request. Terminal forecast information for all Air Force bases and for Patuxent River Naval Air Station, Maryland, will be available. Pilots should make full use of this service in requesting weather information.

IMPLEMENTATION OF 136.80 MC IN CHANNEL "G": Use of 136.80 mc to replace 137.70 mc as GCA Search Control Frequency in "G" Channel was implemented December 1, 1950. Frequency 137.70 mc was retained in GCA units for a period of 30 days after implementation of 136.80 mc. Frequency 136.80 mc was implemented at VHF/DF stations within the continental U. S., replacing 137.70 mc on December 1, 1950, and will be used on a secondary basis as a common VHF/DF training frequency. (Where VHF/DF and GCA facilities are within interference rng of each other, routine navigational VHF/DF aid will be furnished on Channel G on a secondary basis, emergency VHF/DF aid will be on 121.5 mc, and tactical or training frequencies avail. will be used whenever possible. Pilots and operators engaging in VHF/DF training will monitor G channel before transmitting so as not to interfere with GCA transmission.) Secondary uses of 137.70 mc by tactical organizations will be conducted on 136.80 mc after implementation.

SPECIAL CHARTS OF ATOMIC ENERGY AIRSPACE RESERVATIONS: The Atomic Energy Commission has issued a special chart depicting airspace reservations in the United States. Copies of this chart are being supplied each Air Force Base, AF Reserve Unit, National Guard Unit and other activities on the same mailing list basis as used for Airman's Guide. Operations officers should prominently display this chart and assure that pilots contemplating flight adjacent to these areas are briefed upon their existence, location and restricted status.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR Facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

√CHANGES FOR PILOT'S HANDBOOK, SPECIAL JET U. S.: JAL 6-RNG, dtd Oct. 1950, Birmingham, Ala. Missed approach: If not VFR at 3000' make 180° turn, maintain 3000' and home on Birmingham Rdo. Request instructions from Birmingham Approach Control.

√CHANGES FOR PILOT'S HANDBOOK (EAST) U. S.: (1) AL-494 dated 2 Nov 50, Homestead, Fla. Alt over Homestead rng on final 1200', mag crs and dist Homestead rng to arpt 87°, 5.1 statute mi. If visual ctc not established at authorized landing minimums within 5.1 mi after passing rng stn, climb to 1400' on E crs.

(2) AL-342 dtd 29 Dec 49, Rantoul, Ill, Chanute AFB. Initial approach SE 1900', int SW crs LAF rng, SW 2000' N crs EFF rng, NW 1900' SW crs JOT rng.

(3) Columbus, Ga., Lawson AFB. From Lawson rng freq. 335 kc, ident. LSF. Min ceiling over arpt: 700'. Initial apch: NW 3000' from int E crs Maxwell rng; SW 3000' from int NW crs Dothan rng; NW 3000' from int SW crs Campbellton rng; SE no apch, Ft. Benning danger area. Shuttle 3000' on SW crs within 25 mi. Procedure turn E side of SW crs 2000' within 25 mi. Alt over Lawson rng on final apch 1000'. Mag crs and dist stn to fld 21°, 3.3 mi. Missed apch - If visual ctc not established at authorized landing minimums within 3.3 mi after passing Lawson rng or if landing not accomplished climb to 3000' MSL on NE crs within 25 mi ctc Lawson twr for further instructions.

(4) AL 381 dtd 11 Aug 1950, Hunter AFB, Savannah, Ga. Initial apch NE crs 1400' from CHS rng stn. Missed apch procedure climb to 1400' on NE crs.

(5) AL 290 dtd 30 Jan 1950, Norfolk NAS. Initial apch: E - Minimum Enroute Altitude 1500' after int NE crs Norfolk (ORF) rng; W - 1500' from Eclipse FM.

(1-16-51)

CHANGES FOR PILOT'S HANDBOOK (WEST) U. S.: (1) Perrin AFB, Sherman, Texas. The following instrument approach procedure is authorized utilizing the Perrin rdo rng, freq. 335 kc, ident. PNX, field elev. 753', ceiling 520'. Initial apch altitudes: NE, minimum enroute alt: SE - 3000' from int NE crs Ft. Worth rng; SW - 3000' from int NW crs Dallas rng; NW - 3000' from int N crs Ft. Worth rng. Final apch crs SE. Procedure turn E side SE crs 2500' within 25 mi. Alt over Perrin rng on final apch 1700' MSL. Bear. and dist. stn to fld: 314°, 3.7 mi. If visual etc not established at authorized landing mins. within 3.7 mi after passing Perrin rdo rng or if landing not accomplished, climb to 3000' MSL on NE crs.

(2) Offutt AFB, Omaha, Neb. ADF procedure. Change min alt from OMA rng to Offutt homer to 2700', change Glenwood FM and Weeping Water Homer to primary fixes.

CIVIL SPECIAL NOTICES

CIVIL DATA: The airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible, the items should be reported directly to the Office of Aviation Development, Attention: W-155, C.A.A., Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Notices to Airmen Section.

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in or over Canadian territory.

INSTRUCTIONS FOR MONITORING ILS: Communications should be established with the appropriate control tower or with the communications stations where there is no control tower prior to starting an ILS approach. This is in order to receive advisory information, as to the operation of the facility. It is also recommended that the aural signal of the ILS be monitored during an approach to assure continued reception and receipt of advisory information.

OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereat.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitation, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions of short duration) carried in the Notices to Airmen Section are facility coordinates, post-deadline data, or data impossible to incorporate in the two above tabulations.

DIRECT COMMUNICATIONS WITH AIR ROUTE TRAFFIC CONTROL CENTERS: The CAA has inaugurated a procedure whereby pilots operating on IFR flight plans may have direct communication with air route traffic controllers at certain control centers. VHF on a simplex basis (call-up and reply on the same frequency) is used. This enables the controller to issue traffic clearances and receive indications of compliance therewith in such a manner that all air traffic is expedited. The center will guard the assigned frequency. However, each specific aircraft, with which the center desires to establish direct communication for control purposes, will receive a clearance through the appropriate CAA, AACS or Air Carrier Communications Station, indicating the time or place the controller desires to communicate directly with the pilot.

The following locations at which this direct communications procedure is available are also listed in the Air Navigation Radio Aids Section of the Airman's Guide. Each one is listed alphabetically following the tower listing. When additional locations establish this procedure they will be similarly listed.

Radio Call	Frequency	Commissioned
Oakland Center	120.3 mc	October 30, 1950
Chicago Center	119.5 mc	May 10, 1949
Washington Center	120.3 mc	September 1, 1949
New York Center	120.7 mc	January 25, 1950
	120.3 mc	October 11, 1950
Atlanta Center	120.7 mc	July 1, 1950
Pittsburgh Center	118.7 mc	November 2, 1950
Detroit Center	119.1 mc	December 21, 1950
Cleveland Center	120.3 mc	November 3, 1950

DANGER AREA VIOLATIONS (CAMP CAMPBELL, KY.): It has been reported that frequent violations by aircraft, both military and civil, have been observed over this area. It must be emphasized to all pilots that this practice may result in tragic consequences. Recent months have brought intensified training here with artillery fire reaching a maximum ordinate of 10,000' . Subject area is located NW of Clarksville, Tenn. and is depicted on aeronautical charts and described in the Flight Information Manual.

CORRECTIONS TO AIRMAN'S GUIDE. Correct Airman's Guide, Vol. 5, No. 20, dated Dec. 19, 1950, as follows:

(1) Page 80, under Air Route Traffic Control Area Boundary Revisions - correct second paragraph to read: Effective immediately, the NEW YORK - PITTSBURGH air route traffic control area boundary on Green 4 is relocated to 10 miles E of the Mt. Union intsxn.

(2) Page 80, under Non-Standard Holding Patterns - correct paragraph (1) to read: Holding point - Mt Union Intsxn, direction from holding point - W, direction of turn - RIGHT on N side of the E crs of Altoona, Pa.

DANGER AREA AMENDMENTS: The following Danger Area amendments shall be effective as dated, unless otherwise advised:

AMENDMENT NO. 62 (January 15, 1951)

A Bethany Beach, Delaware, area is added to read: Location: **Bethany Beach (Was**hington Chart); Description: Beginning at lat. 38°36'50"N, long. 74°59'50"W; southerly paralleling the shoreline at a distance of 3 nautical miles to lat. 38°23'05"N, **lon**g. 74°59'35"W; westerly following the arc of a circle with a radius of 20,000 yards centered **a**t lat. 38°32'30"N, **lon**g. 75°03'15"W to lat. 38°22'40"N, long. 75°01'35"W, N to lat. 38°32'30"N, **long.** 75°03'15"W; NE to lat. 38°36'50"N, long. 74°59'50"W, point of beginning; **Altitudes**: Unlimited; **Time:** Continuous; Using Agency: 1st Army Ground Forces.

AMENDMENT NO. 63 (January **19, 1951)**

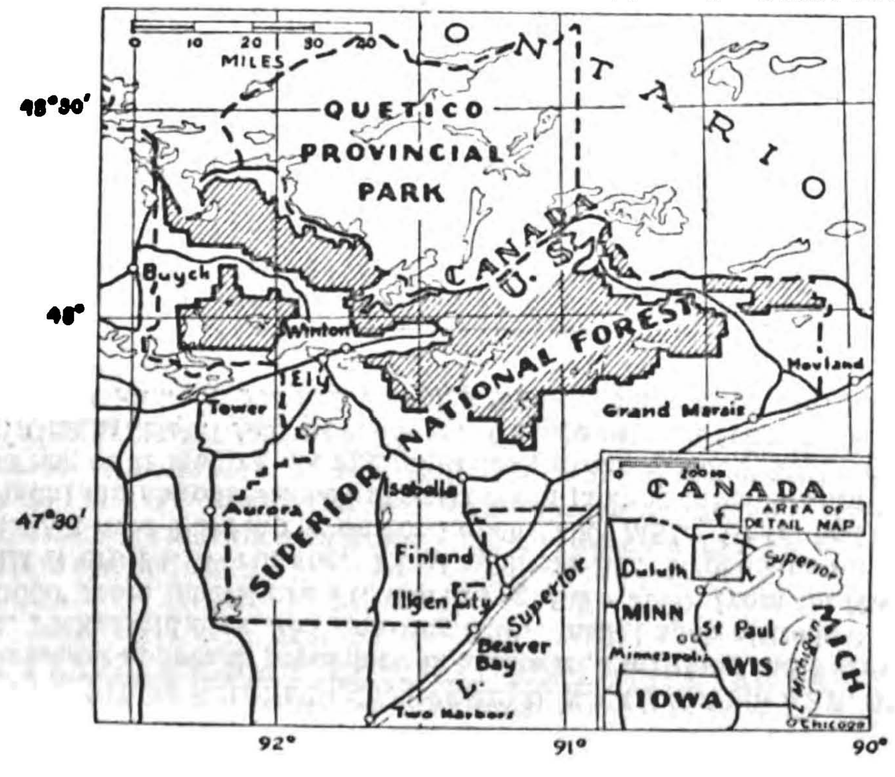
1. The Camp Chaffee, Arkansas, area published on November **18, 1950, in 15 F. R. 7872,** is amended by changing the "Description by Geographical **C**oordinates" **column to read:** "Beginning at lat. 35°16'00"N, long. 94°01'30"W; due S to **l**at. 35°11'30"N; **due W to long.** 94°10'00"W; due N to lat. 35°14'00"N; due W to **long.** 94°15'00"W; **NW to** lat. **35°14'45"N,** long. 94°16'30"W; northerly to lat. 35°18'15"N, **long. 94°**17'00"W; **ESE to lat. 35°16'00"N,** long. 94°01'30"W, point of beginning.

2. A Hunter-Liggett, California area is **added** to read: Location: Hunter-Liggett **(San** Francisco Chart); Description: Beginning at lat. 36°03'30"N, long. 121°16'30"W; SE **to lat.** 35°54'45"N, long. 121°05'00"W; SW to lat. 35°51'45"N, long. 121°07'45"W; WSW **to lat. 35°** 49'45"N, long. 121°21'00"W; NW to lat. 35°53'00"N, long. 121°24'45"W; due N to **lat. 36°01'** 00"N; ENE to lat. 36°03'30"N, long. 121°16'30"W, point of beginning; Altitudes: **Surface to** 10,000 ft.; Time: Continuous; Using Agency: 6th Army, Camp Roberts, California.

3. A Juan De Fuca, Washington, area is added to read: Location: **Juan De Fuca (Belling-**ham Chart); Description: N boundary: United States - Canadian Border; E **boundary**: **long.** 123°42'00"W; S boundary: 1/2 mile N of and parallel to the shoreline of Washington; **W** boundary: long. 124°25'00"W; Altitudes: Surface to 5000 feet; Time: **Continuous; Using** Agency: Fleet Air Wing Four, Whidbey Island NAS, Washington.

ON-REQUEST REPORTING POINT: Effective February 3, 1951, the following on-request reporting point is established: RIDGEWOOD - the intsxn of the S crs of Poughkeepsie, **N. Y. and the NW crs of La Guardia, N. Y.**

AIRSPACE RESERVATION ESTABLISHED AT SUPERIOR NATIONAL FOREST, MINNESOTA: On January 2, 1951, Executive Order No. 10,092, signed by the President on December 17, 1949, becomes effective. The Executive Order establishes a new airspace reservation over several areas of Superior National Forest. The Order prohibits the flight of aircraft below 4,000 feet a.s.l. over the areas known as the Superior Roadless Area, the Little Indian Sioux Roadless Area, and the Caribou Roadless Area. These areas are shown below:



The Order directs the Secretary of Agriculture to carry out its provisions, and for such purposes he has been authorized to prescribe appropriate regulations, pertinent sections of which are quoted below:

"Sec. 251.27 Emergency landing and rescue operations. The pilot of any aircraft landing within any of said areas for reasons of emergency or for conducting rescue operations, shall inform the Forest Supervisor within seven days after the termination of the emergency or the completion of the rescue operation as to the date, place, and duration of landing, and the type and registration number of the aircraft.

"Sec. 251.28 Low flights. Any person making a flight within said airspace reservation for reasons of safety or for conducting rescue operations shall, upon request of the Forest Supervisor, make available to him all reports and records relating to such flight.

"Sec. 251.29 Permits. Permits for the navigation of aircraft within said airspace reservation until January 1, 1952, for the purpose of direct travel to and from private lands within any of said areas will be issued by the Forest Supervisor to the pilot or owner of such lands whenever it is shown by the applicant to the satisfaction of the Forest Supervisor that air travel was a customary means of ingress to and egress from such lands prior to December 17, 1949. No person shall navigate an aircraft within said airspace reservation except as authorized by such permit or by the provisions of Secs. 251.27, 251.28 and 251.30. Upon request of the Forest Supervisor, the reports, records, and other information as to any flights made pursuant to such permits shall be made available.

"Sec. 251.30 Official flights. The provisions of Secs. 251.27, 251.28, and 251.29 will not apply to flights made for conducting or assisting in the conduct of official business of the United States, the State of Minnesota or of Cook, St. Louis or Lake County, Minnesota.

"Sec. 251.31 Conformity with law. Nothing in these regulations shall be construed as permitting the operation of aircraft contrary to the provisions of the Civil Aeronautics Act of 1938 (52 Stat. 973), as amended, or any rule, regulation or order issued thereunder."

CIVIL AIRWAY, CONTROL AREA EXTENSION, CONTROL ZONE AND REPORTING POINT AMENDMENTS: Unless otherwise advised, civil airways, control area extensions, control zones and reporting points are amended in whole or in part as follows:

Effective January 14, 1951:

Civil Airways: Red civil airway No. 10 (Pueblo, Colo. to Charleston, S. C.) is amended to read: .....Campbellton, Ga. rdo rng stn; Atlanta, Ga. rdo rng stn, excluding the portion which overlaps the Camp Gordon, Ga. danger area; Augusta, Ga. rdo rng stn to the Charleston, S. C. rdo rng stn.

Control Area Extensions: Control area extension (Augusta, Ga.) is amended to read: From the Augusta, Ga. rdo rng stn extending 5 miles on the E side and 2 miles on the W side of the S crs of the Augusta, Ga. rdo rng to a point 20 miles S of the rdo rng stn, and extending 5 miles either side of the centerline of the north-south rnwy of Bush Field, Augusta, Ga. to a point 20 miles S of Bush Field.

Control Zones: Augusta, Ga. control zone is amended to read: Within a 5 mile radius of Bush Field extending 2 miles either side of the E and W courses of the Augusta, Ga. rdo rng to a point 10 miles W of the rdo rng stn including a 5 mile radius of Daniel Field extending 2 miles either side of the S crs of the rdo rng to a point 10 miles S of the rdo rng stn.

Effective February 6, 1951:

Civil Airways: (1) Amber civil airway No. 3 (El Paso, Texas to Great Falls, Mont) is corrected by changing the name "Engle, N. Mex. to Hot Springs, N. Mex."

(2) Red civil airway No. 1 (Portland, Oreg. to Kansas City, Mo.) is amended between Malad City, Idaho and Rock Spring, Wyo. to read: Malad City, Idaho rdo rng stn; the intsxn of the SE crs of the Malad City, Idaho. rdo rng and the N crs of the Fort Bridger, Wyo. rdo rng to the Rock Spring, Wyo. rdo rng stn.

(3) Red civil airway No. 51 (El Paso, Texas to U. S. Mexican Border) is amended by changing the portion after Marfa, Texas VHF rdo rng stn to read: Big Bend, Texas non-directional rdo bcn to the U. S. Mexican Border.

Control Area Extensions: (1) Control area extension Abilene, Texas is revoked.

(2) Control area extension (Silver Lake, Calif.) is added to read: From the Silver Lake, Calif. rdo rng stn extending 5 miles either side of the NW crs of the rdo rng to a point 25 miles NW of the rdo rng stn.

(3) Control area extension (Smithville, Tenn) is amended to read: From the Smithville, Tenn. rdo rng stn extending 5 miles either side of the NE crs of the rdo rng to a point 20 miles NE of the rdo rng stn.

(4) Control area extensions Lake Charles, La., Brownsville, Texas, Galveston, Texas and 3 control extensions at New Orleans, La. are amended by adding the following to present designations: "excluding that portion below 2500 feet between the U. S. shoreline and the New Orleans Oceanic Control Area."

Control Zones: The following (5 mi. control zones) are amended by deleting the following airports:

Anchorage, Alaska:	Merrill Field
Nome, Alaska:	Marks AFB
Bedford, Mass.:	Bedford Municipal Airport

(2) Providence, R. I. control zone is amended to read: Within a 5 mile radius of the Theodore Francis Green Airport extending 2 miles either side of the SW crs of the Providence R. I. rdo rng to a point 10 miles SW of the rdo rng stn.

(3) Garden City, Kansas control zone is amended to read: Within a 5 mile radius of the (old) Garden City Municipal Airport including a 5 mile radius of the (new) Garden City Municipal Airport extending 2 miles either side of the N crs of the Garden City rdo rng to a point 10 miles N of the rdo rng stn, and extending 2 miles either side of the 288° radial of the Garden City omnirng to a point 10 miles NW of the omnirng stn.

(4) Hutchinson, Kansas control zone is amended by adding to present designation. .... and extending 2 miles either side of the 32° and 212° radials of the Hutchinson omnirange from the Hutchinson Municipal Airport to a point 10 miles SW of the omnirng stn.

(5) Dodge City, Kansas control zone is amended by adding to present designation: ... and extending 2 miles either side of the 150° and 330° radials of the Dodge City omnirng from the Dodge City Municiapl Airport to a point 10 miles NW of the omnirng stn.

(6) Savannah, Ga. control zone is amended by adding to present designation: ... and extending 2 miles either side of the centerline of the east-west rnwy of Travis Field to a point 10 miles W of Travis Field.

(7) Aberdeen, S. Dak. control zone is amended by correcting the name of airport from Aberdeen Airport to "Aberdeen Municipal Airport, Saunders Field."

(8) Bedford, Mass. control zone is added to read: Within a 5 mile radius of the Lawrence G. Hanscom Field, Bedford, Mass. extending 2 miles either side of the ILS localizer course to a point 10 miles SW of the localizer.

(9) Anchorage, Alaska control zone is added to read: Within a 15 mile radius of Anchorage International Airport (lat 61°10'00", long. 149°59'30").

(10) Hobbs, N. Mex. control zone is added to read: Within a 15 mile radius of Lea County Airport, Hobbs, N. Mex.

Reporting Points: (1) Amber civil airway No. 3 (El Paso, Texas to Great Falls, Mont.) is amended by changing the name Engle, N. Mex. to "Hot Springs, N. Mex."

(2) Blue civil airway No. 78 is amended to read: (Spring Bay, Utah to Malad City, Idaho). No reporting point designation.

CORRECTIONS TO FLIGHT INFORMATION MANUAL: Correct Flight Information Vol. 5, No. 1, dated August 1, 1950, as follows:

(1) Page 10. Change Fort Myers, Fla. telephone numbers: CAA to 2-7441, weather bureau to 5-5431.

(2) Page 10. Change Chicago, Ill CAA phone to read: Portsmouth 7-6637 and Portsmouth 7-6638.

WEATHER REPORTING SERVICE

These notices are being discontinued on a trial basis since it is believed a requirement no longer exists for publication of this information in "Airman's Guide". Subscribers wishing the notices resumed should write to the Chief, U. S. Weather Bureau, Washington 25, D. C., Attention Synoptic Section. If the demand and justification for reinstatement of the notices are sufficient, appropriate action will be taken.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.
** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.
★ - New or revised radio data to be inscribed on charts or added to records.
NOTE: Because of space limitations such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

ALABAMA: ALBERTVILLE ARPT: 200' NW end NW/SE Strip ruf. (1-4)
BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. Taxi with ctn thru intsxn Rnwy 6-24 and black top rnwy, two high intensity rnwy lgts are lctd in center of black top rnwy. E/W and NE/SW Sod Strips clsd (const). (12-5) No Navy acft svcg avail from lcl sunset to 0800 CST. Crash and rescue facs avail 2400-0700 on 1 hr req to NAS. (5-30)
BROOKLEY AFB (MOBILE): Rnwys under const 0700-1630, Mon-Fri. (10-5) Acft making VFR descent to Brookley under low visibility conditions will letdown S of Mobile to avoid Bates Fld and G-6 Arwys tfc. (10-18)
CRAIG AFB (SELMA): Ext inst trng on Craig rng 0800-1700 during IFR conditions. (2-6)
**EVERGREEN-MIDDLETON FLD, SITE 20, MSY-ATL: 24" bcn changed to 36" bcn flash. white and green. (1-11)
HUNTSVILLE ARPT: Use N/S Rnwy only. (1-12)
MAXWELL AFB (MONTGOMERY)-RADIO: USAF Z mrkr inaudible above 5600'. (12-7)
MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (9-20)
MUSCLE SHOALS ARPT: Lgts on Rnwys 6-24, 18-36 inop. (1-3)
TUSCALOOSA-VAN DE GRAAFF ARPT: NW/SE Strip under const, mrkd. Lnd, take-off N of this area and cross const at mrkd taxiway only. (1-4)
ARIZONA: ARIZONA-SPECIAL NOTICE: Lndg of acft on highways of Colorado River Indian Reservation prohibited by law. (6-22)
DATELAND AF AUX (AZTEC)-RADIO: USAF X-Band radar bcn inop. (10-17)
DAVIS-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. Rnwy 8-26 clsd. (6-27)
PHOENIX-SKY HARBOR ARPT: Use rnwys only. Ctl twr being erected approx 800' N of intsxn of Rnwy 12-30 and N/S Taxiway. Ctn - equip crossing taxiway. Rnwy 12-30 clsd. (12-1)
ARKANSAS: BENTON ARPT: W half N/S Strip clsd (const). (1-4)
BENTONVILLE ARPT: Strip under const. Use taxi strip for lndg. (1-4)
BRINKLEY ARPT, SITE 37, DAL-LOU: Clsd ngts. Water in center of strip intsxn. Rows of dirt on SW end NE/SW Strip. (1-4)
FLIPPEN-RADIO: Omnirng flgt-checked Jan. 15, oper normal.
LITTLE ROCK-ADAMS ARPT-TOWER: Transmitting and rcvr poor on all VHF freq S to W account obsts near temp twr until approx Mar. 1, 1951. (12-13) Apch ctl on 353 kc shut down until approx Feb. 27. (11-27) FLD: Use ctn lndg NE or N, vision of ctl twr partially obstructed. (12-21) Lmtd NG svcg avail. (10-24)
PINE BLUFF-RADIO: About Jan. 29, visual-aural rng will be shut down until approx April 23 for conversion to omnirng. (1-8)
CALIFORNIA: BURBANK-LOCKHEED AIR TERMINAL: Clsd to all trans P-80 acft except on special projects for modification. (7-3) Clsd to all trans jet acft. (11-20)
CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Flgt Strip at lat 34-13-00, long. 119-05-00; thence to lat 34-08-35, long. 119-04-06; thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat 33-57-30, long. 119-08-30. Drone acft will oper below 300' during VFR weather conditions from 0800 to 1 hr before sunset, daily, Mon thru Sat.

[redacted]: CASTLE AFB (MERCED)-RADIO: USAF LF rng unreliable - use for homing only. X-band radar bcn (AN/CPN-6) unreliable. (1-9)
CASTLE AFB (MERCED): Acft parked on lndg mat. Use Rnwy 12-30 only. (6-28)
CHINO-PACIFIC AIRMOTIVE ARPT: Ctn - F-51 and C-54 acft operg in vcnty. Acft parked on mat area; taxying on rnwys. (11-9)
CRESCENT CITY-RADIO: Omnirng radials 90° thru 180° to 270° usable dist 25 mi. (10-10)
CULVER CITY-HUGHES ARPT: 6500' of strip under const, mrkd. Area avail to acft under 30,000 lbs. gross. (1-4)
EDWARDS AFB (MUROC): Lctd within a danger area. Clsd to all trans acft except on written permission C. G., Air Materiel Command. Acft will not carry trans passengers to this fld. Ctc twr at least 25 mi out during daylgt hrs for permission to cont to fld. (8-3)
FORT ORD (MONTEREY): P-lines and rising elev 1/4 mi E. Lnd only in area mrkd in white. (10-24)
FRESNO AIR TERMINAL: Open trenches and vehicles adj rnwys, taxiways. (1-1)
GEORGE AFB (VICTORVILLE): Ctn - rnwys under repair. (8-3)
HAMILTON AFB-RADIO: Temp compass locator operg on 219 kc has been installed at lat 38-02-56, long. 122-29-44. Oper with voice and ctld by twr. Bear., dist to Rnwy 30: 300°, 1300'. Oper cont. (12-16)
HAMILTON AFB (SAN RAFAEL): Ctn - const on Rnwy 12-30. (9-21)
HAYWARD ARPT: Rnwy 10R-28L reserved for acft with cruising speed greater than 130 mph. Rnwy 10L-28R reserved for acft with cruising speed less than 130 mph. (1-3)
LONG BEACH-EAST LONG BEACH ARPT: Strip 21 under const. Use oiled area for lndg and take-offs. (1-8)
LOS ANGELES INTNL ARPT-TOWER: Nov 10, new temp ILS lclzr, channel "Y" 109.9 mc comm, serving Rnwy 25L. Ident: LAX. Course aligned on centerline at apch end Rnwy 25L. (11-7) FLD: Rnwys 4-22, 11-29 clsd (const). Rnwy 7L-25R usable portion 4500' from apch end 25R. Const across W end Rnwy 25R. Equip on and adj const area. Use paved areas only. Two green transverse bar lgts mrk threshold Rnwy 25L. (11-10)
LOS ANGELES-SAN FERNANDO VALLEY ARPT: 55' obst lgtd ctl twr being erected 800' N of existing twr. (1-4)
MARCH AFB (RIVERSIDE)-RADIO: USAF VHF/DF oper: 0800-0200 daily. (1-2)
MARCH AFB (RIVERSIDE): Formations more than 15 acft expect delay more than 1 hr. (1-15)
MOFFETT NAS (MTN VIEW): Max. wheel load: Rnwy 14L-32R, 40,000 lbs; Rnwy 14R-32L, 30,000 lbs. (10-3)
MONTEREY-PENINSULA ARPT: Equip end Rnwy 28. Observe twr for lgts in addition to rdo clearance. (2-1)

OAKLAND ARPT: Rnwy 6-24 clsd. Channel clsd to seaplanes, LST craft moored in channel. Lgt acft use gravel area. Large acft use concrete taxiways. Const vcnty hangar 5 and lndg area from hangar 3 to W bndry. New hi-intensity apch lgt lane Rnwy 9L-27R operg on test basis. (1-5)
